HEDIS® MY 2026 Quality Reference Guide

Updated to reflect NCQA HEDIS® Measurement Year (MY) 2026 Technical Specifications

We strive to provide quality healthcare to our membership as measured through HEDIS quality metrics. We created the HEDIS® MY 2026 Quality Reference Guide to help you increase your practice's HEDIS rates and to address care opportunities for your patients. Please always follow state and/or CMS billing guidance and ensure codes are covered prior to submission.

What is HEDIS®?

HEDIS® (Healthcare Effectiveness Data and Information Set) is a set of standardized performance measures developed by the National Committee for Quality Assurance (NCQA) to objectively measure, report, and compare quality across health plans. NCQA develops HEDIS measures through a committee represented by purchasers, consumers, health plans, healthcare providers, and policymakers.

What Are the Scores Used For?

As state and federal governments move toward more quality-driven healthcare, HEDIS rates are becoming more important for both health plans and individual providers. State purchasers of healthcare use aggregated HEDIS rates to evaluate health insurance companies' efforts to improve preventive health outreach for patients.

Physician-specific scores are also used to measure your practice's preventive care efforts. Your practice's HEDIS score determines your rates for physician incentive programs that pay you an increased premium — for example, Pay for Performance or Quality Bonus Funds.

How Are Rates Calculated?

HEDIS rates can be calculated in two ways: administrative data or hybrid data. Administrative data includes claim or encounter data and electronic clinical data systems (ECDS) data. ECDS uses data directly from EHRs, claims, and registries, which reduces manual burden and increases efficiency. Hybrid data consists of both administrative data and a sample of medical record data. Hybrid data requires review of a random sample of member medical records to abstract data for services rendered but that were not reported to the health plan through claims/encounter data. Accurate and timely claim/encounter data can reduce the need for medical record review. If services are not billed, not billed accurately, or not shared through electronic data feeds, they are not included in the calculation.

How Can I Improve My HEDIS® Scores?

- Submit claim/encounter data for each and every service rendered
- Make sure that chart documentation reflects all services billed
- Bill (or report by encounter submission) for all delivered services, regardless of contract status
- Ensure that all claim/encounter data is submitted in an accurate and timely manner
- Include CPT II codes to provide additional details and reduce medical record requests
- Implement a supplemental data feed to capture relevant HEDIS data, such as test results not obtained via claims or services rendered before the member's enrollment, for more accurate reporting
- Engage in alternative EMR connectivity options based on your EMR such as Athena Moments of Care, Healow Insights, Epic Payor Platform, etc.

How Does Meridian's Quality Improvement Team Support Providers?

Meridian's Quality Improvement (QI) Program aims to continuously improve the delivery of healthcare services in a low-resource environment to enhance the overall health status of members. Our team partners with providers to fulfill this objective and ensure members receive high-quality, medically appropriate, and cost-effective healthcare. **To support providers, we also publish this**

guide, which contains descriptions of HEDIS measures and coding requirements for capturing performance.

Go to the [Meridian Quality Improvement Resources](#) section of this guide for essential information about additional QI resources and expectations for providers, such as:

- Overview of the Consumer Assessment of Healthcare Providers and Systems (CAHPS®) survey
- CAHPS® Outpatient Mental Health Survey Information
- Health Outcomes Survey (HOS)
- Critical Incidents (CI) reporting
- Cultural Competence training and tips
- Social Determinants of Health (SDOH) screening
- Quality Education Webinars
- Access and Availability Standards
- Caring for Individuals with Intellectual and Developmental Disabilities (IDD)
- Early Periodic Screening, Diagnosis, and Treatment (EPSDT) resources

Partnering with the Health Plan on HEDIS

- Meridian Medicaid
- Wellcare Meridian Dual Align (HMO D-SNP)
- YouthCare (Medicaid)
- Ambetter (Marketplace)
- Wellcare (Medicare)
- 📄 Electronic Clinical Data Systems (ECDS) HEDIS measure

Introduction

This guide contains information about the quality measures for the following Meridian lines of business:

- **Meridian Medicaid Plan (Medicaid)**

The Meridian Medicaid Plan in Illinois provides government-sponsored managed care services to families, children, seniors and individuals with complex medical needs through Medicaid across the state.

- **Wellcare Meridian Dual Align (HMO D-SNP)**

Wellcare By Meridian combines Medicaid and Medicare Advantage benefits into one integrated plan.

- **YouthCare (Medicaid)**

The YouthCare HealthChoice Illinois program is a specialized healthcare program built cooperatively with parents and other stakeholders to improve access, continuity of care, and healthcare outcomes for Department of Children and Family Services (DCFS) youth in care and former youth in care.

- **Ambetter of Illinois (Marketplace)**

Ambetter offers quality and affordable health insurance in Illinois that fits various needs and budgets.

- **Wellcare (Medicare)**

Medicare Advantage (MA) plans that offer Medicare Part A, Part B, and Part D benefits.

Provider Incentive Programs ●●●●●

Partnership for Quality (P4Q) measures are on the provider portal. Visit our [secure provider portal](#) to view the recent P4Q measures available to our Meridian provider partners.

For additional information about provider incentive programs, please contact your organization's assigned Provider Engagement Account Manager or Quality Practice Advisor. If your practice doesn't have an assigned representative, please complete the [Provider Engagement intake form](#) or consult our [Provider Engagement page](#) for additional contact options.

Provider incentive programs apply to non-risk contracted providers only.

HEDIS MY 2026 Summary of Changes

The following changes are effective for 2026.

This guide has been updated with information from the release of the HEDIS 2026 Volume 2 Technical Specifications by NCQA and is subject to change.

Retired Measures:

NCQA is retiring the following two measures in MY 2026.

- Asthma Medication Ratio (AMR)
- Medical Assistance with Smoking and Tobacco Use Cessation (MSC)

New Electronic Clinical Data Systems (ECDS) Measures

As NCQA advances its multiyear transition to digital reporting, the following measures can be reported using the ECDS method beginning in MY 2026.

- Blood Pressure Control for Patients with Diabetes (BPD-E)
- Follow-Up After Acute and Urgent Care Visits for Asthma (AAF-E)*
- Tobacco Use Screening and Cessation Intervention (TSC-E)*

* *These new measures replace the AMR and MSC measures noted in the "Retired Measures" section above.*

Measures that are now ECDS-only

For three common HEDIS measures below, only the ECDS reporting method can be used. There will no longer be a hybrid sample for the LSC, SPC, and SPD measures beginning in MY 2026.

- Lead Screening in Children (LSC-E)
- Statin Therapy for Patients with Cardiovascular Disease (SPC-E)
- Statin Therapy for Patients with Diabetes (SPD-E)

Revised Measures

Please refer to each measure's listing within the guide for the latest measure description.

- **Adult Immunization Status (AIS-E)** now has a COVID-19 indicator for adults 65 years of age and older.
- **Depression Screening and Follow-Up for Adolescents and Adults (DSF-E); Prenatal Depression Screening and Follow-Up (PND-E); and Postpartum Depression Screening and Follow-Up (PDS-E)** now allow the PROMIS® Emotional Distress instrument as an approved depression screening instrument for adults 18 years of age and older.
- **Follow-Up After High Intensity Care for Substance Use Disorder (FUI)** has been revised in two critical ways:
 - Modified numerators allow substance use disorder diagnoses in any position on the claim.
 - An expanded numerator now includes peer support as an appropriate follow-up visit.
- **Social Needs Screening and Intervention (SNS-E)** added provider assessments to the screening numerators.

Terminology Changes for 2026

NCQA is adopting new terms for consistency with FHIR® data standards and to reflect how measures are used.

Previous Terminology (MY 2025)	New Terminology (MY 2026)
Measurement Year	Measurement Period
Members	Persons
Eligible Population	Initial Population
Required Exclusions	Denominator Exclusions

Medication Safety Measures

In MY 2025, Meridian began emphasizing three additional measures related to medication safety. Find these in the [Pharmacy Measures section](#) of the guide.

- Use of High-Risk Medications in Older Adults (DAE)

Pharmacy Quality Alliance (PQA) Measures

The guide includes two pharmacy-related measures established and updated by the Pharmacy Quality Alliance (PQA), an independent nonprofit national organization dedicated to improving medication safety, adherence, and appropriate use. Visit [PQAalliance.org](https://www.pqaalliance.org) for more information and resources.

- Concurrent Use of Opioids and Benzodiazepines (COB)
- Polypharmacy: Use of Multiple Anticholinergic Medications in Older Adults (POLY-ACH)

Electronic Clinical Data Systems (ECDS)

Tip: Look for the  icon to quickly identify HEDIS measures that are only reported using the ECDS method.

ECDS (Electronic Clinical Data Systems) are the network of data containing a patient's personal health information and records of their experiences within the healthcare system. They may also support other care-related activities directly or indirectly, including evidence-based decision support, quality management, and outcome reporting. Data in these systems are structured such that automated quality measurement queries can be consistently and reliably executed, providing results quickly and efficiently to the team responsible for patient care.

Establishing an enterprise network of interoperable electronic data systems will foster a patient-centered, team-based approach to improving healthcare quality and communication across healthcare service providers.

ECDS reporting is part of NCQA's larger strategy to enable a Digital Quality System and is aligned with the industry's move towards greater interoperability of health information. Visit www.ncqa.org/ecds for more information and frequently asked questions about ECDS reporting.

The goal is to promote the integration of clinical information by automatically transferring data for gap closure. ECDS measures allow for plans to view quality care prospectively as opposed to reviewing quality care retrospectively.

ECDS data sources include:

- Enrollment
- Claims
- Encounters
- EHRs
- HIEs
- Registries
- Case Management

Tips for successful gap closure for all measures include:

- Establish electronic data transfers, such as supplemental data files
 - Refer to [Supplemental Data source section](#)
- Include CPT II codes on claims
- Ensure CPT II, LOINC, and SNOMED codes are all linked in your provider EMR system
 - LOINC and SNOMED value sets are transferred electronically, not on claims
- Develop and execute a data strategy prior to HEDIS transitioning to ECDS only

ECDS reporting highlights:

The following measures have transitioned to ECDS-only reporting for **MY 2026**:

- Lead Screening In Children (LSC-E)
- Statin Therapy for Patients with Cardiovascular Disease (SPC-E)
- Statin Therapy for Patients with Diabetes (SPD-E)

Other ECDS measures developed that are currently being measured and reported include:

- Follow-Up After Acute and Urgent Care Visits for Asthma (AAF-E)
- Follow-Up Care for Children Prescribed ADHD Medication (ADD-E)
- Adult Immunization Status (AIS-E)
- Metabolic Monitoring for Children and Adolescents on Antipsychotics (APM-E)
- Unhealthy Alcohol Use Screening and Follow-Up (ASF-E)
- Breast Cancer Screening (BCS-E)
- Blood Pressure Control for Patients With Hypertension (BPC-E)
- Blood Pressure Control for Patients With Diabetes (BPD-E)
- Cervical Cancer Screening (CCS-E)
- Childhood Immunization Status (CIS-E)
- Colorectal Cancer Screening (COL-E)
- Documented Assessment After Mammogram (DBM-E)
- Utilization of the PHQ-9 to Monitor Depression Symptoms for Adolescents and Adults (DMS-E)

- Depression Remission or Response for Adolescents and Adults (DRR-E)
- Depression Screening and Follow-Up for Adolescents and Adults (DSF-E)
- Follow-Up After Abnormal Mammogram Assessment (FMA-E)
- Immunizations for Adolescents (IMA-E)
- Postpartum Depression Screening and Follow-Up (PDS-E)
- Prenatal Depression Screening and Follow-Up (PND-E)
- Prenatal Immunization Status (PRS-E)
- Social Need Screening and Intervention (SNS-E)
- Tobacco Use Screening and Cessation Intervention (TSC-E)

Visit www.ncqa.org/ecds for more information and FAQs about ECDS reporting.

ECDS Transition Timeline for Hybrid Measures

	MY2025	MY2026	MY2027	MY2028	MY2029
Lead Screening in Children (LSC)		ECDS Only			
Weight Assessment and Counseling for Nutrition and Physical Activity in Children and Adolescents (WCC)			Admin Only		
Prenatal and Postpartum Care (PPC)				Admin Only	
Controlling High Blood Pressure (CBP)	+ECDS				
Blood Pressure Control for Patients with Diabetes (BPD)		+ECDS		ECDS Only	
Glycemic Status Assessment for Patients with Diabetes (GSD)			+ECDS		ECDS Only
Transition of Care (TRC)			+ECDS		ECDS Only
Care for Older Adults (COA)			+ECDS		ECDS Only

Supplemental Data & EHR Connectivity

Supplemental data is data that is captured for HEDIS care gap closure, and used in rate calculation, but is not submitted through claims processing. It allows for services rendered to be captured for gap closure.

Supplemental Data Benefits

- Improve accuracy by minimizing human intervention and error that can occur through chart reviews and data entry
- Increase efficiency of data retrieval to support real-time intervention with patients for care gap closure
- Cost efficient
- Eliminate the burden on provider staff submitting high volumes of medical records
- Increase provider incentive earnings and improve provider performance
- Captures lab results and blood pressure readings, if CPT II codes are not captured on claims

Supplemental Data Implementation

If you are interested in setting up a supplemental data feed, please contact our HEDIS Operations team at ILHEDISOps@mhplan.com

Please include the following information:

- Main point of contact regarding the data feed
- IP Address
- Tax ID Number(s)
- Product lines you plan to submit data for (Ambetter, Meridian, Wellcare, and/or YouthCare)
- List of individuals to be involved in the implementation communication
 - Please include the person responsible for generating the file and submitting the data

EHR Connectivity

Connectivity directly through your electronic health record (EHR) system supports additional functionality that typically benefits providers and is the future of electronic measurement—allowing for interoperability across healthcare systems.

Our HIPAA-compliant solutions currently support integration with major EHR platforms:

- EPIC
- Healow Insights (eClinical Works)
- Athena (Moments of Care)
- Oracle Health (Cerner/Millennium) – *Wellcare and Ambetter only*
- Veradigm (Practice Fusion, Allscripts, Nextgen) – *Wellcare and Ambetter only*

Visit our [Interoperability page](#) to learn more and begin the process of customizing a solution for your organization.

Adult Health

- Meridian Medicaid

- YouthCare (Medicaid)
- Ambetter (Marketplace)
- Wellcare (Medicare)
- 📄 Electronic Clinical Data Systems (ECDS) HEDIS measure

Adults' Access to Preventive/Ambulatory Health Services (AAP) ●●●

The AAP measure evaluates the percentage of persons 20 years of age and older who had an ambulatory or preventive care visit. Services that count include outpatient evaluation and management (E&M) visits, consultations, assisted living/home care oversight, preventive medicine, and counseling.

AAP Measure Codes

Description	CPT*	HCPCS*	ICD-10-CM*
Ambulatory Visits	92002, 92004, 92012, 92014, 98000-98016, 98966-98968, 98970-98972, 98980-98981, 99202-99205, 99211-99215, 99242-99245, 99304-99310, 99315-99316, 99341-99345, 99421, 99341, 99347-99350, 99381-99387, 99391-99397, 99401-99404, 99411, 99412, 99421-99423, 99429, 99441-99443, 99457, 99458, 99483	G0071, G0402, G0438, G0439, G0463, G2010, G2012, G2250-G2252, S0620-S0621, T1015	

AAP Measure Codes (continued)

Description	CPT*	HCPCS*	ICD-10-CM*
Reason for Ambulatory Visit			Z00.00, Z00.01, Z00.121, Z00.129, Z00.3, Z00.5, Z00.8, Z02.0-Z02.6, Z02.71, Z02.79, Z02.81-Z02.84, Z02.89, Z02.9, Z76.1, Z76.2

*Codes subject to change

Advanced Care Planning (ACP) ●●

The ACP measure evaluates the percentage of adults 66 to 80 years of age with advanced illness, an indication of frailty, or who are receiving palliative care and had advanced care planning, and adults 81 years of age or older who had advanced care planning during the measurement period.

A discussion or documentation about preferences for resuscitation, life-sustaining treatment, and end-of-life care.

ACP Measure Codes

Description	Codes*
Advanced Care Planning	CPT: 99483, 99497 CPT-CAT-II: 1123F, 1124F, 1157F, 1158F HCPCS: S0257 ICD-10: Z66

*Codes subject to change

Adult Immunization Status (AIS-E) ●●●●👤

AIS-E is an Electronic Clinical Data Systems (ECDS) measure.

AIS-E evaluates the percentage of adults 19 years of age and older who are up to date on recommended routine vaccines for influenza, tetanus and diphtheria (Td) or tetanus, diphtheria and acellular pertussis (Tdap), zoster, pneumococcal, hepatitis B, and coronavirus disease 2019 (COVID-19).

Influenza:

- Persons who received an influenza vaccine on or between July 1 of the year prior to the measurement period and June 30 of the measurement period

Td/Tdap:

- Persons who received at least one Td vaccine or one Tdap vaccine between 9 years prior to the start of the measurement period and the end of the measurement period

Zoster:

- Persons who received two doses of the herpes zoster recombinant vaccine at least 28 days apart, any time on or after the patient's 50th birthday and before or during the measurement period

Pneumococcal:

- Persons who were administered at least one dose of an adult pneumococcal vaccine on or after their 19th birthday and before or during the measurement period

Hepatitis B:

- Persons who received at least two doses of the adult hepatitis B vaccine on or after their 19th birthday, administered at least 28 days apart

COVID-19:

- Persons who were administered at least one dose of a COVID-19 vaccine that occurred **both** on or between July 1 of the year prior to the measurement period through June 30 of the measurement period **and** on or after their 65th birthday

AIS-E Measure Codes

Description	Codes*
Adult Influenza Immunization	CVX: 88, 135, 140, 141, 144, 150, 153, 155, 158, 166, 168, 171, 185, 186, 197, 205, 320

Appropriate Treatment for Upper Respiratory Infection (URI) ●●●●

The URI measure evaluates the percentage of episodes for persons 3 months of age and older with a diagnosis of upper respiratory infection (URI) that did not result in an antibiotic-dispensing event.

Antibiotic Medications	
• Amikacin	• Fosfomycin
• Amoxicillin	• Gemifloxacin
• Amoxicillin/Clavulanate	• Gentamicin
• Ampicillin	• Levofloxacin
• Ampicillin/Sulbactam	• Lincomycin
• Azithromycin	• Linezolid
• Aztreonam	• Metronidazole
• Cefaclor	• Minocycline
• Cefadroxil	• Moxifloxacin
• Cefazolin	• Nafcillin
• Cefdinir	• Nitrofurantoin
• Cefepime	• Nitrofurantoin, Macrocrystals/ Nitrofurantoin, Monohydrate
• Cefixime	• Ofloxacin
• Cefotaxime	• Oxacillin
• Cefotetan	• Penicillin G Benzathine
• Cefoxitin	• Penicillin G Benzathine/ Penicillin G Procaine
• Cefpodoxime	• Penicillin G Potassium
• Cefprozil	• Penicillin G Procaine
• Ceftazidime	• Penicillin G Sodium
• Ceftriaxone	• Penicillin V Potassium
• Cefuroxime	• Piperacillin/Tazobactam
• Cephalexin	• Rifampin
• Chloramphenicol	• Streptomycin
• Ciprofloxacin	• Sulfadiazine
• Clarithromycin	• Sulfamethoxazole/Trimethoprim
• Clindamycin	• Tetracycline
• Dalfopristin/Quinupristin	• Tobramycin
• Daptomycin	• Trimethoprim
• Dicloxacillin	• Vancomycin
• Doxycycline	
• Erythromycin	

Note: Comprehensive Diabetes Care (CDC) was replaced by the following three measures in MY 2024: Glycemic Status Assessment for Patients with Diabetes (GSD), Blood Pressure Control for Patients with Diabetes (BPD), and Eye Exam for Patients with Diabetes (EED).

Glycemic Status Assessment for Patients with Diabetes (GSD) ●●●●

The GSD measure evaluates persons 18–75 years of age with diabetes (Type 1 and 2) whose most recent glycemic status (hemoglobin A1C [HbA1c] or glucose management indicator [GMI]) was at the following levels during the measurement period.

Two rates are reported:

- Glycemic Status <8.0%
- Glycemic Status >9.0% (lower rate indicates better performance)

GSD Measure Codes

Description	Codes*
HbA1c Lab Test (used to identify the last assessment of the measurement period, but does not close the care gap without a result)	CPT: 83036, 83037 LOINC: 4548-4, 17855-8, 17856-6, 4549-2, 96595-48
HbA1c Level Greater Than 9.0	CPT-CAT-II: 3046F
HbA1c Level Greater Than or Equal to 7.0 and Less Than 8.0	CPT-CAT-II: 3051F
HbA1c Level Greater Than or Equal to 8.0 and Less Than or Equal to 9.0	CPT-CAT-II: 3052F
HbA1c Level Less Than 7.0	CPT-CAT-II: 3044F
Glucose management indicator (GMI)	LOINC: 97506-0

*Codes subject to change

Blood Pressure Control for Patients with Diabetes (BPD) & Blood Pressure Control for Patients with Diabetes (BPD-E)* ●●●👤

* Note that voluntary ECDS reporting for the BPD-E measure is available beginning in MY 2026.

The BPD measure evaluates the percentage of persons 18 to 75 years of age with diabetes (Types 1 and 2) whose last blood pressure (BP) reading of the measurement period was adequately controlled (<140/90 mm Hg).

- Consider taking two readings at each office visit. Sometimes a second blood pressure reading is lower.
- Do not round blood pressure; always use exact numbers
- Include CPT-CAT-II codes on claims to ensure the blood pressure reading is received by the health plan

BPD Measure Codes

Description	Codes*
Diastolic 80-89	CPT-CAT-II: 3079F
Diastolic Greater Than or Equal to 90	CPT-CAT-II: 3080F
Diastolic Less Than 80	CPT-CAT-II: 3078F
Systolic Greater Than or Equal to 140	CPT-CAT-II: 3077F
Systolic Less Than 130	CPT-CAT-II: 3074F
Systolic 130–139	CPT-CAT-II: 3075F

*Codes subject to change

Eye Exam for Patients with Diabetes (EED) ●●●●

The EED measure evaluates the percentage of persons 18 to 75 years of age with diabetes (Types 1 and 2) who had a retinal eye exam.

- Include CPT-CAT-II codes on claims to ensure the eye exam result is received by the health plan

EED Measure Codes

Description	Codes*
Unilateral Eye Enucleation	CPT: 65091, 65093, 65101, 65103, 65105, 65110, 65112, 65114
Automated Eye Exam	CPT: 92229
Eye Exam with Retinopathy	CPT-CAT-II: 2022F, 2024F, 2026F
Eye Exam Without Retinopathy	CPT-CAT-II: 2023F, 2025F, 2033F
Diabetes Mellitus without Complications (Also requires Diabetic Retinal Screening code to close care gap)	ICD-10: E10.9, E11.9, E13.9
Retinal Eye Exams	CPT: 92002, 92004, 92012, 92014, 92018, 92019, 92134, 92137, 92201, 92202, 92230, 92235, 92250, 99203, 99204, 99205, 99213-99215, 99242-99245 HCPCS: S3000, S0621, S0620
Retinal imaging	CPT: 92227-92228
Diabetic Retinal Screening negative in the prior year	CPT-CAT-II: 3072F

*Codes subject to change

Kidney Health Evaluation for Patients with Diabetes (KED) ●●●●

The KED measure evaluates the percentage of persons 18 to 85 years of age with diabetes (Type 1 and Type 2) who received a kidney health evaluation, defined by an estimated glomerular filtration rate (eGFR) and a urine albumin-creatinine ratio (uACR), during the measurement period.

KED Measure Codes

Description	Codes*
Estimated Glomerular Filtration Rate (eGFR)	CPT: 80047, 80048, 80050, 80053, 80069, 82565
Urine Albumin-Creatinine Ratio (uACR) Quantitative Urine Albumin Test AND Urine Creatinine Test with dates of service four days or less apart	CPT: 82043, 82570
Urine Albumin Creatinine Ratio (uACR)	LOINC: 13705-9, 14958-3, 14959-1, 30000-4, 44292-1, 59159-4, 76401-9, 77253-3, 77254-1, 89998-9, 9318-7

*Codes subject to change

Diabetes Monitoring for People with Diabetes and Schizophrenia (SMD) ●

The SMD measure evaluates the percentage of persons 18 to 64 years of age with schizophrenia or schizoaffective disorder and diabetes who had both an LDL-C test and an HbA1c test performed during the measurement period.

SMD Measure Codes

Description	Codes*
HbA1C Lab Tests	CPT: 83036, 83037
Most recent hemoglobin A1c (HbA1c) level less than 7.0% (DM)	CPT-CAT-II: 3044F
Most recent hemoglobin A1c level greater than 9.0% (DM)	CPT-CAT-II: 3046F
Most recent hemoglobin A1c (HbA1c) level greater than or equal to 7.0% and less than 8.0% (DM)	CPT-CAT-II: 3051F
Most recent hemoglobin A1c (HbA1c) level greater than or equal to 8.0% and less than or equal to 9.0% (DM)	CPT-CAT-II: 3052F

SMD Measure Codes (continued)

LDL-C Lab Tests	CPT: 80061, 83700, 83701, 83704, 83721
Most recent LDL-C less than 100 mg/dL (CAD) (DM)	CPT-CAT-II: 3048F
Most recent LDL-C 100-129 mg/dL (CAD) (DM)	CPT-CAT-II: 3049F
Most recent LDL-C greater than or equal to 130 mg/dL (CAD) (DM)	CPT-CAT-II: 3050F

*Codes subject to change

Diabetes Screening for People with Schizophrenia or Bipolar Disorder Who Are Using Antipsychotic Medications (SSD) ●

The SSD measure evaluates the percentage of persons 18 to 64 years of age with schizophrenia, schizoaffective disorder, or bipolar disorder who were dispensed an antipsychotic medication and had a diabetes screening test during the measurement period.

SSD Measure Codes

Description	Codes*
HbA1C Lab Tests	CPT: 83036, 83037
Most recent hemoglobin A1c (HbA1c) level less than 7.0% (DM)	CPT-CAT-II: 3044F
Most recent hemoglobin A1c level greater than 9.0% (DM)	CPT-CAT-II: 3046F
Most recent hemoglobin A1c (HbA1c) level greater than or equal to 7.0% and less than 8.0% (DM)	CPT-CAT-II: 3051F
Most recent hemoglobin A1c (HbA1c) level greater than or equal to 8.0% and less than or equal to 9.0% (DM)	CPT-CAT-II: 3052F
Glucose Lab Tests	CPT: 80047, 80048, 80050, 80053, 80069, 82947, 82950, 82951

*Codes subject to change

Cardiac Rehabilitation (CRE) ●●●

The CRE measure evaluates the percentage of persons 18 years of age and older who attended cardiac rehabilitation following a qualifying cardiac event, such as:

- Coronary artery bypass grafting
- Heart or heart/lung transplantation
- Heart valve repair/replacement
- Myocardial infarction
- Percutaneous coronary intervention

It is important that patients have the following schedule of cardiac rehabilitation:

- **Initiation:** At least 2 sessions within 30 days after the event
- **Engagement:**
 - At least 12 sessions within 90 days after the event
 - At least 24 sessions within 180 days after the event
- **Achievement:**
 - At least 36 sessions within 180 days after the event
 - Encourage patients to have annual testing

*Codes subject to change

Colorectal Cancer Screening (COL-E) ●●●●👤

COL-E evaluates the percentage of persons 45 to 75 years of age who had one or more appropriate screenings for colorectal cancer.

Appropriate screenings are defined by one of the following:

- Colonoscopy during the measurement period or the nine years prior to the measurement period
- CT colonography during the measurement period or the four years prior to the measurement period
- Flexible sigmoidoscopy during the measurement period or the four years prior to the measurement period
- FIT-DNA during the measurement period or the two years prior to the measurement period
- FOBT during the measurement period

Care for Older Adults (COA) ●

The COA measure evaluates the percentage of persons 66 years of age and older who had both of the following in the measurement period:

- Medication review
 - Perform an annual medication review of the person's medications, including prescription medications, over-the-counter medications, and herbal or supplemental therapies.
- Functional status assessment

This assessment measures the person's ability to perform daily tasks and helps to identify any functional decline. For Wellcare By Meridian (D-SNP) patients, please indicate in the medical record:

- Activities of Daily Living (ADL) — Note and date when activities like bathing, dressing, eating, transferring, using toilet, and walking were assessed.
- Instrumental Activities of Daily Living (IADL) — Note and date when activities like shopping, driving or using public transportation, meal preparation, housework, taking medications, and using the telephone were assessed.
- Standardized functional status assessments — Note results and dates of assessments like the Assessment of Living Skills and Resources (ALSAR), the Barthel Index and the Physical Self-Maintenance Scale, Bayer Activities of Daily Living (B-ADL) Scale, or Extended Activities of Daily Living (EADL) Scale.

Controlling High Blood Pressure (CBP) & Blood Pressure Control for Patients with Hypertension (BPC-E)* ●●●●👤

* Note: Introduced in MY 2025, the BPC-E measure is reported using the ECDS method, and the denominator includes a pharmacy data method with a hypertension diagnosis. The CBP measure is expected to be retired by NCQA in MY 2028.

The CBP and BPC-E measures evaluate the percentage of patients 18 to 85 years of age who had a diagnosis of hypertension (HTN) and whose last blood pressure (BP) reading of the measurement year was adequately controlled (<140/90 mm Hg).

- Consider taking two readings at each office visit. Sometimes a second blood pressure reading is lower.
- Do not round blood pressure; always use exact numbers
- Include CPT-CAT-II codes on claims to ensure the blood pressure reading is received by the health plan

Persistence of Beta-Blocker Treatment After a Heart Attack (PBH) ●●●

The PBH measure evaluates the percentage of patients 18 years of age and older during the measurement year who were hospitalized and discharged from July 1 of the year prior to June 30 of the measurement year with a diagnosis of AMI and who received persistent beta-blocker treatment for six months after discharge.

Eligible Medications	
• Acebutolol	• Hydrochlorothiazide-propranolol
• Atenolol	• Labetalol
• Atenolol-chlorthalidone	• Metoprolol
• Bendroflumethiazide-nadolol	• Nadolol
• Betaxolol	• Nebivolol
• Bisoprolol	• Pindolol
• Bisoprolol-hydrochlorothiazide	• Propranolol
• Carvedilol	• Sotalol
• Hydrochlorothiazide-metoprolol	• Timolol

Pharmacotherapy Management of COPD Exacerbation (PCE) ●●●

The PCE measure evaluates the percentage of COPD exacerbations for patients 40 years of age and older who had an acute inpatient discharge or ED visit on or between January 1–November 30 and were dispensed appropriate medications.

Two rates are reported:

- Dispensed a systemic corticosteroid (or there was evidence of an active prescription) within 14 days of the event
- Dispensed a bronchodilator (or there was evidence of an active prescription) within 30 days of the event

Eligible Medications	
• Acclidinium-bromide	• Fluticasone-vilanterol
• Albuterol	• Ipratropium
• Albuterol-ipratropium	• Levalbuterol
• Arformoterol	• Metaproterenol
• Budesonide-formoterol	• Methylprednisolone
• Cortisone	• Olodaterol
• Dexamethasone	• Olodaterol-tiotropium
• Formoterol	• Prednisolone
• Formoterol-acclidinium	• Prednisone
• Formoterol-glycopyrrolate	• Salmeterol
• Formoterol-mometasone	• Tiotropium
• Fluticasone furoate - umeclidinium-vilanterol	• Umeclidinium
• Fluticasone-salmeterol	• Umeclidinium-Vilanterol

Plan All Cause Readmissions (PCR) ●●●●

The PCR measure evaluates persons 18 years of age and older who had an acute inpatient and observation stay that was followed by an unplanned acute readmission for any diagnosis within 30 days and the predicted probability of an acute readmission.

What Providers Can Do

- See the patient within seven days of discharge
- Educate the patient and family about the diagnosis and care plan
- Review medication list
- Establish care goals with the patient
- Identify barriers to health for the patient that may have contributed to the hospitalization and discuss strategies for addressing them

How Meridian Can Help

- Meridian will notify PCPs during the Transition of Care (TOC) process
- A TOC letter is faxed to the PCP within 24 hours of discharge
- Meridian’s Interdisciplinary Care Team (ICT) reviews individual care plans
- Educate patients on appropriate Emergency Department utilization

Transitions of Care (TRC) ●●

The TRC measure evaluates the percentage of discharges for persons 18 years of age and older who had each of the following:

- Notification of Inpatient Admission (NIA)
- Receipt of Discharge Information (RDI)
- Patient Engagement After Inpatient Discharge (PE)
- Medication Reconciliation Post-Discharge (MRPD)

Remember to:

- Document receipt of notification of inpatient admission on the day of admission through two days after admission (for a total of 3 days)
- Document receipt of notification of discharge on the day of discharge through two days after discharge (for a total of 3 days)
- Document patient engagement within 30 days after discharge (e.g., office visits, visits to the home, telehealth)
- Document medication reconciliation on the date of discharge through 30 days after discharge (for a total of 31 days)

Patient engagement provided within 30 days after discharge. Do not include patient engagement that occurs on the date of discharge. The following meet criteria for patient engagement:

- An outpatient visit
- A telephone visit
- Transitional care management services
- An e-visit or virtual check-in

Medication reconciliation must be conducted by a prescribing practitioner, clinical pharmacist, physician assistant, or registered nurse on the date of discharge through 30 days after discharge (31 total days).

Use of Imaging Studies for Low Back Pain (LBP) ●●●●

The LBP measure evaluates persons 18 to 75 years of age with a principal diagnosis of low back pain who did not have an imaging study (plain X-ray, MRI, CT scan) within 28 days of the diagnosis. *A lower rate indicates better performance.*

Numerator: An imaging study with a diagnosis of uncomplicated low back pain on the IESD or in the 28 days following the IESD

According to the National Committee for Quality Assurance (NCQA), 75 percent of American adults will experience low back pain at some time in their lives, making it one of the most common reasons patients seek healthcare services.

Please consider imaging studies for lower back pain only if red flags are present or if there is no improvement after four weeks.

Alternative Recommendations

Meridian encourages its providers to refer to the Agency for Healthcare Research and Quality website (ahrq.gov) for standards and guidelines in managing your patients' acute lower back pain.

Follow-Up After Emergency Department Visit for Mental Illness (FUM) ●●●●

The FUM measure evaluates persons 6 years of age and older with a principal diagnosis of mental illness or self-harm who had a follow-up visit for mental illness after an Emergency Department (ED) visit.

Two rates are reported:

- The percentage of ED visits for which the person received follow-up within 7 days of the visit (8 total days)
- The percentage of ED visits for which the person received follow-up within 30 days of the visit (31 total days)

Follow-Up After Emergency Department Visit for Substance Use (FUA) ●●●●

The percentage of Emergency Department (ED) visits among persons 13 years of age and older with a principal diagnosis of substance use disorder (SUD), or any diagnosis of drug overdose, for which there was follow-up.

Two rates are reported:

- The percentage of ED visits for which the person received follow-up within 30 days of the visit (31 total days)
- The percentage of ED visits for which the person received follow-up within 7 days of the visit (8 total days)

Follow-Up After High Intensity Care for Substance Disorder (FUI) ●●●

The FUI measure evaluates the percentage of acute inpatient hospitalizations, residential treatment, or detoxification visits for a diagnosis of substance use disorder among persons 13 years of age and older that result in a follow-up visit or service for substance use disorder.

FUI measure reports two rates:

- The percentage of visits or discharges for which the person received follow-up for substance use disorder within the 30 days after the visit or discharge
- The percentage of visits or discharges for which the person received follow-up for substance use disorder within the 7 days after the visit or discharge.

FUI Measure Codes

Description	Additional Criteria (if applicable)	Codes
BH Outpatient	Requires diagnosis of SUD	CPT: 98000-98007, 98960-98962, 99078, 99202-99205, 99211-99215, 99242-99245, 99341-99345, 99347-99350, 99381-99387, 99391-99397, 99401-99404, 99411, 99412, 99510, 99483, 99492-99494, 99510 HCPCS: G0155, G0176, G0177, G0409, G0463, G0512, G0560, H0002, H0004, H0031, H0034, H0036, H0037, H0039, H0040, H2000, H2010, H2011, H2013-H2020, T1015
Online Assessment	Requires diagnosis of SUD	CPT: 98016, 98970-98972, 98980-98981, 99421-99423, 99457, 99458 HCPCS: G0071, G2010, G2012, G2250-G2252
Visit Setting Unspecified	Requires POS code; requires diagnosis of SUD	CPT: 90791, 90792, 90832, 90833, 90834, 90836-90840, 90845, 90847, 90849, 90853, 90875, 90876, 99221-99223, 99231-99233, 99238, 99239, 99252-99255
Partial Hospitalization or Intensive Outpatient	Requires diagnosis of SUD	HCPCS: G0410, G0411, H0035, H2001, H2012, S0201, S9480, S9484, S9485

FUI Measure Codes (continued)

Description	Additional Criteria (if applicable)	Codes
Residential Behavioral Health Treatment	Requires diagnosis of SUD	HCPCS: H0017-H0019, T2048
Substance Use Disorder Services	Requires diagnosis of SUD	CPT: 99408, 99409 HCPCS: G0396, G0397, G0443, H0001, H0005, H0007, H0015, H0016, H0022, H0047, H0050, H2035, H2036, T1006, T1012
Telephone Visits	Requires diagnosis of SUD	CPT: 98008-98015, 98966-98968, 99441-99443
OUD Monthly Office Based Treatment	Requires diagnosis of SUD	HCPCS: G2086-G2087, G2069
OUD Weekly Non-Drug Service	Requires diagnosis of SUD	HCPCS: G2074-G2077, G2080

Follow-Up After Hospitalization for Mental Illness (FUH) ●●●●●

The FUH measure evaluates the percentage of discharges for persons 6 years of age and older who were hospitalized for treatment of selected mental illness or intentional self-harm diagnoses and who had a follow-up visit **with a mental health service**.

Two rates are reported:

- Discharges for which the person received **follow-up within 7 days after discharge**. Do not include visits that occur on the date of discharge.
- Discharges for which the person received **follow-up within 30 days after discharge**. Do not include visits that occur on the date of discharge.

Note: As of MY 2025, follow-up visits can be completed by any qualified provider, including Primary Care Providers (PCPs), if the claim includes a mental health diagnosis and the provider is licensed to bill the appropriate codes.

FUH Measure Codes

Description	Additional Criteria (if applicable)	Codes*
Visit Setting Unspecified	Requires POS code; requires provision by a mental health provider	CPT: 90791, 90792, 90832-90834, 90836-90840, 90845, 90847, 90849, 90853, 90875, 90876, 99221-99223, 99231-99233, 99238, 99239, 99252-99255

Initiation and Engagement of Substance Use Disorder (IET) ●●●●●

The IET measure evaluates the percentage of patients 13 years of age and older with a new episode of substance use disorder that resulted in treatment initiation and engagement who received the following:

- Initiation of substance use disorder treatment: Percentage of patients who initiate treatment through an inpatient new SUD episode that result in treatment initiation through an inpatient SUD admission, outpatient visit, intensive outpatient encounter or partial hospitalization, telehealth, or medication treatment within 14 days
- Engagement of substance use disorder treatment: Percentage of patients who had new SUD episodes that have evidence of treatment engagement within 34 days of the initiation

Alcohol Use Disorder Treatment Medications
<ul style="list-style-type: none"> • Acamprosate (oral; delayed-release tablet) • Disulfiram (oral) • Naltrexone (oral and injectable)

Opioid Use Disorder Treatment Medications
<ul style="list-style-type: none"> • Buprenorphine (implant) • Buprenorphine (injection) • Buprenorphine (sublingual tablet) • Buprenorphine/naloxone (sublingual tablet, buccal film, sublingual film) • Naltrexone (injectable) • Naltrexone (oral)

For the follow-up treatments, include an ICD-10 diagnosis for Alcohol or Other Drug Dependence from the Mental, Behavioral and Neurodevelopmental Disorder Section of ICD-10 along with a procedure code for the preventive service, evaluation, and management consultation or counseling service.

* Codes listed are subject to change. Meridian recognizes that the circumstances around the services provided may not always directly support/match the codes. It is crucial that the medical record documentation describes the services rendered in order to support the medical necessity and use of these codes. Refer to the Appendix for POS codes.

Pharmacotherapy for Opioid Use Disorder (POD) ●●●●

The POD measure evaluates persons 16 years of age and older with a diagnosis of Opioid Use Disorder (OUD) and a new OUD pharmacotherapy that lasted at least 180 days.

The treatment period of 180+ days begins on the new OUD pharmacotherapy event date through 179 days without a gap in treatment of 8 or more consecutive days.

Opioid Use Disorder Treatment Medications

Description	Prescription	Medication Lists
Antagonist	• Naltrexone (oral)	• Naltrexone Oral Medications List
Antagonist	• Naltrexone (injectable)	• Naltrexone Injection Medications List
Partial agonist	• Buprenorphine (sublingual tablet)	• Buprenorphine Oral Medications List
Partial agonist	• Buprenorphine (injection)	• Buprenorphine Injection Medications List
Partial agonist	• Buprenorphine (implant)	• Buprenorphine Implant Medications List
Partial agonist	• Buprenorphine/naloxone (sublingual tablet, buccal film, sublingual film)	• Buprenorphine Naloxone Medications List
Agonist	• Methadone (oral)	• NA (refer to Note below)

Methadone is not included on the medication lists for this measure. Methadone for OUD administered or dispensed by federally certified opioid treatment programs (OTP) is billed on a medical claim. A pharmacy claim for methadone would be indicative of treatment for pain rather than OUD.

Unhealthy Alcohol Use Screening and Follow-Up (ASF-E) ●●●●🏠

ASF-E evaluates the percentage of persons 18 years of age and older who were screened for unhealthy alcohol use using a standardized instrument and, if screened positive, received appropriate follow-up care within 2 months (61 days total).

Eligible standard assessment instruments that have been normalized and validated for the adult patient population with thresholds for positive findings include:

Screening Instrument	Total Score LOINC Codes*	Positive Finding
Alcohol Use Disorders Identification Test (AUDIT) screening instrument	75624-7	Total score ≥ 8
Alcohol Use Disorders Identification Test Consumption (AUDIT-C) screening instrument	75626-2	Total score ≥ 4 for men Total score ≥ 3 for women
Single-question screen (for men): "How many times in the past year have you had 5 or more drinks in a day?"	88037-7	Response ≥ 1
Single-question screen (for women and all adults older than 65 years): "How many times in the past year have you had 4 or more drinks in a day?"	75889-6	Response ≥ 1

Screening for Depression and Follow-Up Plan (CDF-AD) ●

This is a CMS core set measure. For more information, visit [cms.gov](https://www.cms.gov).

The CDF-AD measure evaluates persons 18 years of age and older screened for depression who have never had a diagnosis of depression or bipolar disorder on the date of the encounter or 14 days prior to the date of the encounter using an age-appropriate standardized depression screening tool. If positive, a follow-up plan is documented on the date of the eligible encounter.

CDF-B Codes to Document Depression Screen

Code	Description
G8431	Screening for depression is documented as being positive and a follow-up plan is documented
G8510	Screening for depression is documented as negative; a follow-up plan is not required

**Codes subject to change*

Screening for Depression and Follow-Up Plan (CDF-CH) ●

This is a CMS core set measure. For more information, visit [cms.gov](https://www.cms.gov).

The CDF-CH Measure evaluates patients ages 12 to 17 screened for depression who have never had a diagnosis of depression or bipolar disorder on the date of the encounter or 14 days prior to the date of the encounter using an age-appropriate standardized depression screening tool. If positive, a follow-up plan is documented on the date of the eligible encounter.

CDF-B Codes to Document Depression Screen

Depression Screening and Follow-Up for Adolescents and Adults (DSF-E) ●●●●👤

DSF-E evaluates the percentage of persons 12 years of age and older who were screened for clinical depression between January 1 and December 1 of the measurement period, using a standardized instrument and, if screened positive, received follow-up care within 30 days

* Refer to the Appendix for a list of Approved Depression Screening Instruments, Codes, and Positive Findings

Depression Remission or Response for Adolescents and Adults (DRR-E) ●●●●👤

DRR-E evaluates the percentage of persons 12 years of age and older with a diagnosis of depression and an elevated PHQ-9 score, who had evidence of response or remission within 120–240 days (4 to 8 months) of the elevated score.

- **Follow-Up PHQ-9:** The percentage of persons who have a follow-up PHQ-9 score documented within 120–240 days (4 to 8 months) after the initial elevated PHQ-9 score.
- **Depression Remission:** The percentage of persons who achieved remission of depression symptoms, as demonstrated by the most recent PHQ-9 total score of <5 during the depression follow-up period (within 120–240 days [4–8 months] after the initial elevated PHQ-9 score).
- **Depression Response:** The percentage of persons who showed response to treatment for depression, as demonstrated by the most recent PHQ-9 total score of at least 50% lower than the PHQ-9 score associated with the diagnosis, documented during the depression follow-up period (within 120–240 days [4–8 months] after the initial elevated PHQ-9 score).

Utilization of the PHQ-9 to Monitor Depression Symptoms for Adolescents and Adults (DMS-E)

DMS-E evaluates the percentage of persons 12 years of age and older with a diagnosis of major depression or dysthymia who had an outpatient encounter with a PHQ-9 score present in their record in the same assessment period as the encounter.

The measurement period is divided into three assessment periods with specific dates of service:

- Assessment period 1: January 1–April 30
- Assessment period 2: May 1–August 31
- Assessment period 3: September 1–December 31

- Sulfadiazine
- Sulfamethoxazole/trimethoprim
- Tetracycline
- Tobramycin
- Trimethoprim
- Vancomycin

Follow-Up After Acute and Urgent Care Visits for Asthma (AAF-E) ●●🏠

This is a first-year measure in MY 2026, and the Asthma Medication Ratio (AMR) measure was retired.

The AAF-E measure evaluates the percentage of persons 5–64 years of age with an urgent care visit, acute inpatient discharge, observation stay discharge, or ED visit with a diagnosis of asthma that had a corresponding outpatient follow-up visit with a diagnosis of asthma within 30 days.

Description	Codes*

Social Need Screening and Intervention (SNS-E) ●●●🏠

SNS-E evaluates the percentage of persons who were screened, using prespecified instruments, at least once during the measurement period for unmet food, housing, and transportation needs, and who received a corresponding intervention within one month if they screened positive.

Food Screening: Persons with a documented result for food insecurity screening performed between January 1 and December 1 of the measurement period.

Eligible screening instruments with thresholds for positive findings include:

Tobacco Use Screening and Cessation Intervention (TSC-E) ●●●●👤

This is a first-year measure in MY 2026. Only the Electronic Clinical Data Systems (ECDS) method is used for reporting.

The TSC-E Measure evaluates the percentage of persons 12 years of age and older who were screened for commercial tobacco product use at least once during the measurement period, and who received tobacco cessation intervention if identified as a tobacco user.

Two rates are reported:

- **Tobacco Use Screening:** The percentage of persons who were screened for tobacco use
- **Cessation Intervention:** The percentage of persons who were identified as a tobacco user and who received tobacco cessation intervention

Description	Codes*
Tobacco Use Cessation Counseling	ICD-10-CM: Z71.6

Childhood Immunization Status (CIS-E) ●●●📶

CIS-E evaluates the percentage of children 2 years of age during the measurement year who completed the following immunizations on or before child’s second birthday.

Immunization	Required Doses
DTaP (Diphtheria, Tetanus, Acellular Pertussis)	4 doses
PCV (Pneumococcal Conjugate)	4 doses
HiB (Haemophiles Influenza Type B)	3 doses
Hep B (Hepatitis B)	3 doses
IPV (Polio; Inactivated Polio Virus)	3 doses
Flu (Influenza)	2 doses
RV (Rotavirus)	2 or 3 dose series
Hep A (Hepatitis A)	1 dose on or between the 1st and 2nd birthday
MMR (Measles, Mumps, Rubella)	1 dose on or between the 1st and 2nd birthday
VZV (Chicken Pox; Varicella zoster)	1 dose on or between the 1st and 2nd birthday

Follow-Up Care for Children Prescribed ADHD Medication (ADD-E) ●●👤

The ADD-E measure evaluates the percentage of children newly prescribed attention deficit hyperactivity disorder (ADHD) medication who had at least three follow-up care visits within a 10-month period, one of which was within 30 days of when the first ADHD medication was dispensed.

Two rates are reported:

- **Initiation Phase:** Percentage of patients 6 to 12 years of age with a prescription dispensed for ADHD medication, who had one follow-up visit with a practitioner with prescribing authority during the 30-day Initiation Phase
- **Continuation and Maintenance (C&M) Phase:** Percentage of patients 6 to 12 years of age with a prescription dispensed for ADHD medication, who remained on the medication for at least 210 days and who, in addition to the visit in the Initiation Phase, had at least two follow-up visits with a practitioner within 270 days (9 months) after the Initiation Phase ended.

Immunizations for Adolescents (IMA-E) ●●●🏠

Beginning in MY 2025, this measure transitioned to the Electronic Clinical Data Systems (ECDS) reporting method only.

IMA-E evaluates the percentage of adolescents 13 years of age in the measurement year who completed the following immunizations on or before the person's 13th birthday.

Immunization	Required Doses
Meningococcal	1 dose between the 11th and 13th birthdays
Tdap (Tetanus, Diphtheria Toxoids and Acellular Pertussis)	1 dose between the 10th and 13th birthdays
HPV (Human Papillomavirus)	2 or 3 doses between the 9th and 13th birthdays

Note: HPV is either two doses with 146 days between the first and second dose **OR** three doses on different dates of service

Lead Screening in Children (LSC-E) ●🏠

Beginning in MY 2026, this measure transitioned to the Electronic Clinical Data Systems (ECDS) reporting method only.

The LSC-E measure evaluates the percentage of children 2 years of age in the measurement year who had one or more capillary or venous lead blood test for lead poisoning on or before patient's second birthday.

Lead Test

CPT: 83655

LOINC: 10368-9, 10912-4, 14807-2, 17052-2, 25459-9, 27129-6, 32325-3, 5674-7, 77307-7

**Codes subject to change*

In order to ensure that children receive appropriate public health follow-up services, physicians and other health providers have an obligation to report blood lead results greater than or equal to 10mg/dL within 48 hours to the Illinois Department of Public Health (IDPH) Childhood Lead Poisoning Reporting System. Providers using the IDPH laboratory are not required to report blood lead results.

Illinois Department of Public Health
Illinois Lead Program
535 W. Jefferson Street
Springfield, IL 62761
P: 217-782-3517
www.idph.state.il.us

The Illinois Department of Healthcare and Family Services (HFS) encourages providers to send all blood lead specimens to the IDPH laboratory for analysis. Providers who utilize the state laboratory for blood lead analysis can order supplies for blood lead specimen collection free of charge by calling the IDPH Laboratory Shipping Section at 217-524-6222, or by downloading the Clinical Supplies Requisition Form from the HFS website: <https://www.dph.illinois.gov/>.

Metabolic Monitoring for Children and Adolescents on Antipsychotics (APM-E) ●●👤

The APM-E measure evaluates the percentage of children and adolescents 1 to 17 years of age who had two or more antipsychotic prescriptions and had metabolic testing.

Three rates are reported:

- Percentage of children and adolescents on antipsychotics who received blood glucose testing
- Percentage of children and adolescents on antipsychotics who received cholesterol testing
- Percentage of children and adolescents on antipsychotics who received blood glucose and cholesterol testing

*Codes subject to change

Oral Evaluation, Dental Services (OED) ●●●

The OED measure evaluates the percentage of persons under 21 years of age who received a comprehensive or periodic oral evaluation with a dental provider during the measurement period.

OED Measure Codes

Description	Codes*
Oral Evaluation	CDT: D0120, D0145, D0150

*Codes subject to change

Topical Fluoride for Children (TFC) ●●

The TFC measure evaluates the percentage of children 1 to 4 years of age who received at least two fluoride varnish applications during the measurement period.

TFC Measure Codes

Description	Codes*
Application of Fluoride Varnish	CPT: 99188 CDT: D1206 SNOMED: 313042009

*Codes subject to change

Weight Assessment and Counseling for Nutrition and Physical Activity for Children/Adolescents (WCC) ●●●

The WCC measure evaluates the percentage of children 3 to 17 years of age who had an outpatient visit with a PCP or OB/GYN and who had evidence of each of the following during the measurement period:

- BMI Percentile
- Counseling for Nutrition
- Counseling for Physical Activity

WCC Measure Codes

Description	Codes*
BMI Percentile	ICD-10: Z68.51-Z68.56 LOINC: 59574-4, 59575-1, 59576-9
Nutrition Counseling	CPT: 97802-97804 ICD-10: Z71.3 HCPCS: G0270, G0271, G0447, S9449, S9452, S9470
Physical Activity Counseling	HCPCS: G0447, S9451 ICD-10: Z02.5, Z71.82

*Codes subject to change

Well-Child and Adolescent Well-Care Visits (W30 ●●/WCV ●●●)

The W30/WCV measure evaluates the percentage of persons within designated ages who had comprehensive well-care visit(s) as defined in each measure, with a PCP or an OB/GYN practitioner during the measurement year.

Well-Child Visits in the First 30 Months of Life (W30)

Months of Life: The percentage of children who had the following number of well-child visits with a PCP during the last 15 months

Two rates are reported:

- Well-Child Visits in the First 15 Months
 - Children who turned 15 months old during the measurement period:
 - Six or more well-child visits
- Well-Child Visits for Age 15 Months–30 Months
 - Children who turned 30 months old during the measurement period:
 - Two or more well-child visits

Use of High-Risk Medications in Older Adults (DAE) ●●

The DAE measure evaluates the percentage of persons 67 years of age and older who had at least two dispensing events for the same high-risk medication class.

Three rates are reported:

1. The percentage of Medicare adults 67 years of age and older who had at least two dispensing events for high-risk medications to avoid from the same drug class
2. The percentage of Medicare adults 67 years of age and older who had at least two dispensing events for high-risk medications to avoid from the same drug class, except for appropriate diagnoses
3. Total rate (the sum of the two numerators divided by the denominator, deduplicating for patients in both numerators)

Note: The measure reflects potentially inappropriate medication use in older adults, both for medications where any use is inappropriate (Rate 1) and for medications where use under all, but specific indications is potentially inappropriate (Rate 2). A lower rate represents better performance.

High-Risk Medications

Drug Class	Prescriptions
Anticholinergics, first-generation antihistamines	<ul style="list-style-type: none"> • Brompheniramine • Chlorpheniramine • Cyproheptadine • Dimenhydrinate • Diphenhydramine (oral) • Doxylamine • Hydroxyzine • Meclizine • Promethazine • Triprolidine

High-Risk Medications (continued)

Drug Class	Prescriptions
Anticholinergics, anti-Parkinson agents	<ul style="list-style-type: none"> • Benztropine (oral) • Trihexyphenidyl
Antispasmodics	<ul style="list-style-type: none"> • Atropine • Chlordiazepoxide-clidinium • Dicyclomine • Hyoscyamine • Scopolamine
Antithrombotic	<ul style="list-style-type: none"> • Dipyridamole (oral, excluding extended release)
Cardiovascular, alpha agonists, central	<ul style="list-style-type: none"> • Guanfacine
Cardiovascular, other	<ul style="list-style-type: none"> • Nifedipine (excluding extended release)
Central nervous system, antidepressants	<ul style="list-style-type: none"> • Amitriptyline • Amoxapine • Clomipramine • Desipramine • Imipramine • Nortriptyline • Paroxetine
Central nervous system, barbiturates	<ul style="list-style-type: none"> • Butalbital • Phenobarbital • Primidone
Central nervous system, vasodilators	<ul style="list-style-type: none"> • Ergoloid mesylates (USP)
Central nervous system, other	<ul style="list-style-type: none"> • Meprobamate
Endocrine system, estrogens with or without progestins; include only oral and topical patch products	<ul style="list-style-type: none"> • Conjugated estrogen (USP) • Esterified estrogen (USP) • Estradiol • Estropipate
Endocrine system, sulfonylureas, long-duration	<ul style="list-style-type: none"> • Glimepiride • Glyburide
Endocrine system, desiccated thyroid	<ul style="list-style-type: none"> • Desiccated thyroid
Endocrine system, megestrol	<ul style="list-style-type: none"> • Megestrol
Nonbenzodiazepine hypnotics	<ul style="list-style-type: none"> • Eszopiclone • Zaleplon • Zolpidem

High-Risk Medications (continued)

Drug Class	Prescriptions
Pain medications, skeletal muscle relaxants	<ul style="list-style-type: none"> • Carisoprodol • Chlorzoxazone • Cyclobenzaprine • Metaxalone • Methocarbamol • Orphenadrine
Pain medications, meperidine	<ul style="list-style-type: none"> • Meperidine
Pain medications, other	<ul style="list-style-type: none"> • Indomethacin • Ketorolac, includes parenteral and oral

High-Risk Medications with Days Supply Criteria

Drug Class	Prescriptions	Days Supply Criteria
Anti-Infectives, other	<ul style="list-style-type: none"> • Nitrofurantoin • Nitrofurantoin macrocrystals-monohydrate 	<ul style="list-style-type: none"> • >90 days

High-Risk Medications with Average Daily Dose Criteria

Drug Class	Prescriptions	Days Supply Criteria	Medication Lists
Cardiovascular, other	<ul style="list-style-type: none"> • Digoxin 	<ul style="list-style-type: none"> • >0.125 mg/day 	<ul style="list-style-type: none"> • Digoxin .05 mg per mL • Digoxin .0625 mg • Digoxin .1 mg per mL • Digoxin .125 mg • Digoxin .25 mg • Digoxin .25 mg per mL
Tertiary TCAs (as single agent or as part of combination products)	<ul style="list-style-type: none"> • Doxepin 	<ul style="list-style-type: none"> • >6 mg/day 	<ul style="list-style-type: none"> • Doxepin 3 mg • Doxepin 6 mg • Doxepin 10 mg • Doxepin 10 mg per mL • Doxepin 25 mg • Doxepin 50 mg • Doxepin 75 mg • Doxepin 100 mg • Doxepin 150 mg

High-Risk Medications Based on Prescription and Diagnosis Data
 High-risk medications to avoid from the same drug class, except for appropriate diagnoses

Drug Class	Prescriptions
Antipsychotics, first (conventional) and second (atypical) generation	<ul style="list-style-type: none"> • Aripiprazole • Aripiprazole lauroxil • Asenapine • Brexpiprazole • Cariprazine • Chlorpromazine • Clozapine • Fluphenazine • Haloperidol • Iloperidone • Loxapine • Lurasidone • Molindone • Olanzapine • Paliperidone • Perphenazine • Pimavanserin • Pimozide • Quetiapine • Risperidone • Thioridazine • Thiothixene • Trifluoperazine • Ziprasidone
Benzodiazepines, long, short and intermediate acting	<ul style="list-style-type: none"> • Alprazolam • Chlordiazepoxide • Clobazam • Clonazepam • Clorazepate • Diazepam • Estazolam • Lorazepam • Midazolam • Oxazepam • Temazepam • Triazolam

Adherence to Cholesterol Medications (STAT) ●●

The STAT measure evaluates the percentage of persons 18 years of age and older with the CHOL medication with a Proportion of Days Covered (PDC) \geq 80%.

PDC is calculated utilizing total days supplied of CHOL pharmacy claims/date of first RASA fill to the end of the reporting period.

Each medication claim must be submitted to the health plan (cash payment/samples/filled at out-of-network pharmacy do not count).

CHOL Medications

Prescriptions	
<ul style="list-style-type: none"> • Atorvastatin (Lipitor®) • Fluvastatin (Lescol®) • Lovastatin (Mevacor®) 	<ul style="list-style-type: none"> • Pravastatin (Pravachol®) • Rosuvastatin (Crestor®) • Simvastatin (Zocor®)

Adherence to Diabetes Medications (DIAB) ●●

The DIAB measure evaluates the percentage of patients 18 years of age and older with a diabetes medication with a Proportion of Days Covered (PDC) \geq 80%.

PDC is calculated utilizing total days supplied of diabetes pharmacy claims/ date of first diabetes fill to the end of the reporting period.

Each medication claim must be submitted to the health plan (cash payment/ samples/filled at out-of-network pharmacy do not count).

Diabetes Medications:

Category	Medication
Sulfonylureas	Glipizide and glyburide
Biguanides	Metaform
Thiazolidinediones	Actos (pioglitazone)
Alpha-glucosidase inhibitors	Precose (acarbose)
Glucagon-like peptide 1 (GLP-1) agonists	Adlyxin (lixisenatide), Byetta, Bydureon (exenatide), Ozempic (semaglutide), Tanzeum (albiglutide), Trulicity (dulaglutide) and Victoza (liraglutide)
Sodium-glucose cotransporter 2 (SGLT2) inhibitors	Farxiga (dapagliflozin), Invokana (canagliflozin) and Jardiance (empagliflozin)

Adherence to Hypertensive Medications (RASA) ●●

The RASA measure evaluates the percentage of persons 18 years of age and older with a RASA medication with a Proportion of Days Covered (PDC) \geq 80%.

PDC calculated utilizing total days supplied of hypertensive pharmacy claims/ date of first RASA fill to the end of the reporting period.

Each medication claim must be submitted to the health plan (cash payment/ samples/filled at out-of-network pharmacy do not count).

RASA Medications

Description	Prescription
Direct Renin Inhibitor	<ul style="list-style-type: none"> aliskiren (+/- hydrochlorothiazide)
ARB Medications and Combinations	<ul style="list-style-type: none"> Azilsartan (+/- chlorthalidone) candesartan (+/- hydrochlorothiazide) eprosartan (+/- hydrochlorothiazide) Irbesartan (+/- hydrochlorothiazide) losartan (+/- hydrochlorothiazide) olmesartan (+/- amlodipine, hydrochlorothiazide) Telmisartan (+/- amlodipine hydrochlorothiazide) valsartan (+/- amlodipine, hydrochlorothiazide nebivolol)
ACE Inhibitor Medications	<ul style="list-style-type: none"> benazepril (+/- amlodipine, hydrochlorothiazide) captopril (+/- hydrochlorothiazide) enalapril (+/- hydrochlorothiazide) fosinopril (+/- hydrochlorothiazide) lisinopril (+/- hydrochlorothiazide) moexipril (+/- hydrochlorothiazide) perindopril (+/- amlodipine) quinapril (+/- hydrochlorothiazide) ramipril trandolapril (+/- verapamil)

Concurrent Use of Opioids and Benzodiazepines (COB) ●●●●

Tip: COB is a Pharmacy Quality Alliance (PQA) quality measure. Learn more and obtain additional resources at [PQAAlliance.org](https://www.pqaalliance.org).

The COB measure evaluates the percentage of persons 18 years of age and older with concurrent use of prescription opioids and benzodiazepines during the measurement period.

Benzodiazepine medications ^{1, 2}	
• Alprazolam	• Flurazepam
• Chlordiazepoxide	• Lorazepam
• Clobazam	• Midazolam
• Clonazepam	• Oxazepam
• Clorazepate	• Quazepam
• Diazepam	• Temazepam
• Estazolam	• Triazolam

¹ Includes combination products

² Excludes injectable formulations

Opioid medications ^{1, 2}	
• Benzhydrocodone	• Meperidine
• Buprenorphine	• Methadone
• Butorphanol	• Morphine
• Codeine	• Opium
• Dihydrocodeine	• Oxycodone
• Fentanyl	• Oxymorphone
• Hydrocodone	• Pentazocine
• Hydromorphone	• Tapentadol
• Levorphanol	• Tramadol

¹ Includes combination products and prescription opioid cough medications

² Excludes the following: injectable formulations; sublingual sufentanil (used in a supervised setting); and single-agent and combination buprenorphine products used to treat opioid use disorder (i.e., buprenorphine sublingual tablets, Probuphine® Implant kit subcutaneous implant, and all buprenorphine/naloxone combination products).

Polypharmacy: Use of Multiple Anticholinergic Medications in Older Adults (POLY-ACH) ●●

Tip: POLY-ACH is a Pharmacy Quality Alliance (PQA) quality measure. Learn more and obtain additional resources at [PQAAlliance.org](https://www.pqaalliance.org).

The POLY-ACH measure evaluates the percentage of persons 65 years of age and older with concurrent use of 2 or more anticholinergic medications.

POLY-ACH anticholinergic medications^{1, 2}

Description	Prescriptions
Antihistamine medications	<ul style="list-style-type: none"> • Brompheniramine • Chlorpheniramine • Cyproheptadine • Dimenhydrinate³ • Diphenhydramine (oral) • Doxylamine • Hydroxyzine • Meclizine • Triprolidine
Antiparkinsonian agent medications	<ul style="list-style-type: none"> • Benztropine • Trihexyphenidyl
Skeletal muscle relaxant medications	<ul style="list-style-type: none"> • Cyclobenzaprine • Orphenadrine
Antidepressant medications	<ul style="list-style-type: none"> • Amitriptyline • Amoxapine • Clomipramine • Desipramine • Doxepin (>6 mg/day)⁴ • Imipramine • Nortriptyline • Paroxetine
Antipsychotic medications	<ul style="list-style-type: none"> • Chlorpromazine • Clozapine • Olanzapine • Perphenazine • Darifenacin • Fesoterodine • Flavoxate • Oxybutynin • Solifenacin • Tolterodine • Trospium

POLY-ACH anticholinergic medications (continued)

Description	Prescriptions
Antimuscarinic (urinary incontinence) medications	<ul style="list-style-type: none"> • Darifenacin • Fesoterodine • Flavoxate • Oxybutynin • Solifenacin • Tolterodine • Trospium
Antispasmodic medications	<ul style="list-style-type: none"> • Atropine² • Clidinium-chlordiazepoxide⁵ • Dicyclomine • Homatropine² • Hyoscyamine • Scopolamine²
Antiemetic medications	<ul style="list-style-type: none"> • Prochlorperazine • Promethazine

¹ Includes combination products and prescription opioid cough medications

² Excludes ophthalmics, injectable formulations, sublingual sufentanil, and buprenorphine products used to treat opioid use disorder

³ There are no active NDCs for dimenhydrinate

⁴ Includes doxepin when the daily dose is >6 mg/day

⁵ Chlordiazepoxide is not a target medication as a single drug

Statin Therapy for Patients with Cardiovascular Disease (SPC-E) ●●●●●

Beginning in MY 2026, this measure transitioned to the Electronic Clinical Data Systems (ECDS) reporting method only.

The SPC-E measure evaluates males 21 to 75 years of age and females 40 to 75 years of age who were identified as having Clinical Atherosclerotic Cardiovascular Disease (ASCVD).

Two rates are reported:

- **Received Statin Therapy:** Persons who were dispensed at least one high-intensity or moderate-intensity statin medication during the measurement period
- **Statin Adherence:** Persons who remained on a high-intensity or moderate-intensity statin medication for at least 80% of the treatment period

SPC-E Medications

Description	Prescription
High-intensity statin therapy	• Atorvastatin 40-80 mg
High-intensity statin therapy	• Amlodipine-atorvastatin 40-80 mg
High-intensity statin therapy	• Rosuvastatin 20-40 mg
High-intensity statin therapy	• Simvastatin 80 mg
High-intensity statin therapy	• Ezetimibe-simvastatin 80 mg
Moderate-intensity statin therapy	• Atorvastatin 10-20 mg
Moderate-intensity statin therapy	• Amlodipine-atorvastatin 10-20 mg
Moderate-intensity statin therapy	• Rosuvastatin 5-10 mg
Moderate-intensity statin therapy	• Simvastatin 20-40 mg
Moderate-intensity statin therapy	• Ezetimibe-simvastatin 20-40 mg
Moderate-intensity statin therapy	• Pravastatin 40-80 mg
Moderate-intensity statin therapy	• Lovastatin 40 mg
Moderate-intensity statin therapy	• Fluvastatin 40-80 mg
Moderate-intensity statin therapy	• Pitavastatin 1-4 mg

Statin Therapy for Patients with Diabetes (SPD-E) ●●●●●

Beginning in MY 2026, this measure transitioned to the Electronic Clinical Data Systems (ECDS) reporting method only.

The SPD-E measure evaluates persons 40 to 75 years of age with diabetes (Types 1 and 2) who do not have clinical atherosclerotic cardiovascular disease (ASCVD).

Two rates are reported:

- **Received Statin Therapy:** Persons who were dispensed at least one statin medication of any intensity during the measurement period
- **Statin Adherence 80%:** Persons who remained on a statin medication of any intensity for at least 80% of the treatment period

SPD Medications: High, Moderate, and Low Intensity Statin Medications

Description	Prescription
Amlodipine Atorvastatin High Intensity Medications	amlodipine/atorvastatin
Amlodipine Atorvastatin Moderate Intensity Medications	amlodipine/atorvastatin
Atorvastatin High Intensity Medications	atorvastatin
Ezetimibe Simvastatin High Intensity Medications	ezetimibe/simvastatin
Fluvastatin Moderate & Low Intensity Medications	fluvastatin
Lovastatin Moderate & Low Intensity Medications	lovastatin
Pitavastatin Moderate Intensity Medications	pitavastatin
Pravastatin Moderate & Low Intensity Medications	pravastatin
Rosuvastatin High & Moderate Intensity Medications	rosuvastatin
Simvastatin High, Moderate, & Low Intensity Medications	simvastatin

Breast Cancer Screening (BCS-E) ●●●●🏠

The BCS-E measure evaluates the percentage of persons 40 to 74 years of age who were recommended for routine breast cancer screening and had a mammogram any time on or between October 1 two years prior to the measurement period and the end of the measurement period.

Persons recommended for routine breast cancer screening include:

- Administrative Gender of Female at any time in the patient’s history
- Sex Assigned at Birth of Female at any time in the patient’s history
- Sex Parameter for Clinical Use of Female during the measurement period

Cervical Cancer Screening (CCS-E) ●●🏠

The CCS-E measure evaluates the percentage of persons 21 to 64 years of age who were recommended for routine cervical cancer screening and screened for cervical cancer using either of the following criteria:

- Persons 21 to 64 years of age who had cervical cytology performed within the last 3 years
- Persons 30 to 64 years of age who had cervical high-risk human papillomavirus (hrHPV) testing performed within the last 5 years
- Persons 30 to 64 years of age who had cervical cytology/high risk human papillomavirus (hrHPV) co-testing within the last 5 years

Chlamydia Screening (CHL) ●●

The CHL measure evaluates the percentage of persons 16 to 24 years of age who were recommended for chlamydia screening, identified as sexually active, and who had at least one test for chlamydia.

Meridian covers all types of chlamydia screenings. This includes traditional methods, as well as urine screening (bill with CPT code 87110) for men and women. The advantage to urine screening is that it is simple, quick to administer, and has a higher accuracy rate than other methods.

Note: Bundled STI codes do not capture CHL measure performance, as they may not indicate a completed screening for chlamydia. Please be sure to bill for chlamydia screening separately, or submit chlamydia screening results through supplemental data.

CHL Measure Codes

Prenatal and Postpartum Care (PPC) ●●

The PPC measure evaluates the percentage of deliveries of live births on or between October 8 of the year prior to the measurement period and October 7 of the measurement period. For these persons, the measure assesses the following facets of prenatal and postpartum care.

Timeliness of Prenatal Care: Percentage of deliveries that received a prenatal care visit in the first trimester, on or before the enrollment start date, or within 42 days of enrollment in the organization

Postpartum Care: Percentage of deliveries that had a postpartum visit on or between 7 and 84 days after delivery

PPC Measure Codes

Prenatal Immunization Status (PRS-E) ● 🏠

PRS-E evaluates the percentage of deliveries in the measurement period in which persons had received influenza and tetanus, diphtheria toxoids and acellular pertussis (Tdap) vaccinations.

Influenza:

- Persons who received an adult influenza vaccine on or between July 1 of the year prior to the measurement period and the delivery date

Tdap:

- Persons who received at least one Tdap vaccine during the pregnancy (including on the delivery date)

PRS-E Codes

Description	Codes*

*Codes subject to change

The Advisory Committee on Immunization Practices (ACIP) clinical guidelines recommend that all women who are pregnant or who might be pregnant in the upcoming influenza season receive inactivated influenza vaccines. ACIP also recommends that pregnant women receive one dose of Tdap during each pregnancy, preferably during the early part of gestational weeks 27–36, regardless of their prior history of receiving Tdap.

Prenatal Depression Screening and Follow-Up (PND-E) ● 🏠

PND-E evaluates the percentage of deliveries in which persons were screened for clinical depression while pregnant using a standardized instrument and, if screened positive, received follow-up care within 30 days.

- **Deliveries between January 1 and December 1 of the measurement period:** Screening should be performed between the pregnancy start date and the delivery date (including on the delivery date)
- **Deliveries between December 2 and December 31 of the measurement period:** Screening should be performed between the pregnancy start date and December 1 of the measurement period

** Refer to the Appendix for a list of Approved Depression Screening Instruments, Codes, and Positive Findings*

***Refer to the Appendix for a list of follow-up visit codes*

Postpartum Depression Screening and Follow-Up (PDS-E) ● 🏠

PDS-E evaluates the percentage of deliveries in which persons were screened for clinical depression during the postpartum period (7 to 84 days following delivery), using a standardized instrument and, if screened positive, received follow-up care within 30 days.

** Refer to the Appendix for a list of Approved Depression Screening Instruments, Codes, and Positive Findings*

***Refer to the Appendix for a list of follow-up visit codes*

Consumer Assessment of Healthcare Providers and Systems (CAHPS®) ●●●●●

Every year, a random sample of patients are surveyed about their experience with their providers, services, and health plan. It is an important component of ensuring that patients are satisfied, not only with their health outcomes but also with their healthcare experience.

The CAHPS survey is applicable to **Meridian**, **Wellcare**, and **YouthCare**. For **Wellcare by Meridian** and **Ambetter**, the CAHPS survey is referred to as the Qualified Health Plan (QHP) Enrollee Survey. The CAHPS and the QHP surveys allow patients to evaluate the aspects of care delivery that matter the most to them. At Meridian, we are committed to partnering with our providers to deliver outstanding patient experience.

As a provider, you are the most critical component of that experience. We want to ensure that you know exactly how your patients are evaluating your care. Please take a moment to review and to familiarize yourself with some of the key topics included in the survey.

Survey Measure & Description	Daily Practice Tips
<p>Getting Needed Care: This measure assesses the ease with which patients received the care, tests, or treatment they needed. It also assesses how often they were able to get a specialist appointment scheduled when needed.</p>	<ul style="list-style-type: none"> • Office staff should help coordinate specialty appointments for urgent cases • Encourage patients and caregivers to view results on the patient portal when available • Inform patients of what to do if care is needed after hours • Offer appointments or refills via text and/or email • Offer alternative appointment types to expand access to care (e.g., telephone, telehealth, telemedicine, and patient portals)
<p>Getting Care Quickly: This measure assesses how often patients got the care they needed as soon as they needed it and how often appointment wait times exceeded 15 minutes.</p>	<ul style="list-style-type: none"> • Ensure a few appointments each day are available to accommodate urgent visits • Offer appointments with a nurse practitioner or physician assistant for short notice appointments • Maintain an effective triage system to ensure that frail and/or very sick patients are seen right away or provided alternate care via phone and urgent care • Keep patients informed if there is a longer wait time than expected, and give them an option to reschedule
<p>Care Coordination: This measure assesses providers' assistance with managing the disparate and confusing health care system, including access to medical records, timely follow-up on test results, and education on prescription medications.</p>	<ul style="list-style-type: none"> • Ensure there are open appointments for patients recently discharged from a facility • Integrate PCP and specialty practices through EMR or fax to get reports promptly • Ask patients if they have seen any other providers; discuss visits to specialty care as needed • Encourage patients to bring in their medications to each visit • Share test results and explain what they mean • Provide instructions for follow-up questions or concerns

Survey Measure & Description	Daily Practice Tips
<p>How Well Doctors Communicate: This measure assesses patients' perception of the quality of communication with their doctor. Consider using the Teach-Back Method to ensure patients understand their health information.</p>	<ul style="list-style-type: none"> • Use body language to show you are engaged and listening to the patient (sit down and face the patient; maintain eye contact) • Don't rush; explain things in a way the patient can understand • Be empathetic with bad news. Be sensitive and acknowledge family members or caregivers in the room with the patient • Summarize the visit and next steps in a way the patient can understand • Let the patient know when you will see them next <p>What is Teach-back?</p> <ul style="list-style-type: none"> • Asking a patient (or family member) to explain in their own words what they need to know or do, in a caring way • A way to check for understanding and, if needed, re-explain and check again
<p>Rating of Health Care Quality: The CAHPS® survey asks patients to rate the overall quality of their health care on a 0-10 scale.</p>	<ul style="list-style-type: none"> • Encourage patients to make their routine appointments for checkups or follow up visits as soon as they can – weeks or even months in advance • Ensure that open care gaps are addressed during each patient visit • Make use of the provider portal when requesting prior authorizations

On the following page are examples of **provider experience categories and survey questions** for which your patients are asked to respond; provider discussion questions; and provider tips. We hope this tool will provide reinforcement opportunities for your relationship with the patients you serve.

Sample Questions	Provider Tips
<p>Health Promotion Discussion Questions</p> <p>Any problems with your work or daily activities due to physical problems?</p> <p>Any problems with your work or daily activities due to stress?</p> <p>Anything bothering you or stressful?</p> <p>Are you sad or depressed?</p> <p>Do you use tobacco? (Always/Sometimes/Never)</p> <p>Do you drink alcohol? (Always/Sometimes/Never)</p> <p>Do you exercise? (Always/Sometimes/Never)</p> <p>Do you take aspirin? (Always/Sometimes/Never)</p> <p>Do you or anyone in your family have high blood pressure, high cholesterol or had a heart attack?</p> <p>Have you had a flu shot in the past calendar year? If not, Why?</p>	<ul style="list-style-type: none"> • Complete and document any health assessment on patient • Discuss with patient the benefits of exercise and encourage them to start, increase or maintain physical activity and document discussion • Discuss the risks of tobacco use and recommend medication to assist in stopping • Discuss issues associated with drinking too much alcohol, if necessary • Discuss the risks and benefits of aspirin to prevent heart attack or stroke • Screen patient for high blood pressure and cholesterol • Recommend and/or administer the flu shot during flu season
<p>Medication Discussion Questions</p> <p>Are you currently on any prescription medications from another doctor? If so, what?</p> <p>How long have you been on the medication?</p>	<ul style="list-style-type: none"> • Document all prescription medication patient is taking • Discuss options and reasons to take alternate medications if patient is not getting positive results for symptoms • Discuss reasons with patient why they may need to stop taking a particular medication • Discuss the benefits and risks of taking a medicine • Discuss patient's preference on what medication they feel would be best for them • Review medications prescribed by PCP and specialists and verify results

Sample Questions	Provider Tips
<p>Access to Care Discussion Questions</p> <p>Are you satisfied with the timeframe it took to schedule your appointment?</p> <p>Were you able to get your appointment as soon as you needed?</p> <p>Are you satisfied with the coordination of care you receive, coordinating visits with specialists, non-emergency transportation (if needed) and providing lab or test results?</p>	<ul style="list-style-type: none"> • Evaluate office procedures to improve getting patients scheduled as quickly as possible for their symptoms • Determine why patient perceives difficulty in getting timely care, if necessary • Educate patient on timeframes for getting appointments according to their symptoms • Assist in coordination of non-emergency transportation, if necessary • Use patient experience surveys or post-visit survey results to identify opportunities for improvement

CAHPS® Outpatient Mental Health Survey Information ●●●●●

Annually, NCQA directs health plans to conduct a survey about their members' experience with behavioral health services. The Outpatient Mental Health Survey measures members' experiences and identifies opportunities for health plans and providers to improve quality of care and access to mental health and substance use services.

Composite Measure	Sample Question
Getting Appointments for Prescription Medications	How difficult was it for you to make an appointment with the person who prescribes your mental health medicine? <i>(Very difficult, Somewhat difficult, Not very difficult, Not difficult at all)</i>
Getting Mental Health Counseling	How difficult was it for you to make an appointment with your mental health counselor? <i>(Very difficult, Somewhat difficult, Not very difficult, Not difficult at all)</i>
Communication with Mental Health Counselor	How often did your main mental health counselor listen carefully to you? How often did your main mental health counselor show respect for what you had to say? <i>(Never, Sometimes, Usually, Always)</i>

Composite Measure	Sample Question
Goal Setting	How much did your main mental health counselor consider what is important to you when setting the goals for treatment? <i>(Not at all, A little, Some, A lot)</i>
Getting Help Between Appointments	When you contacted your main mental health counselor between your appointments, how often did you get the help or support you needed? <i>(Never, Sometimes, Usually, Always)</i>
Rating of Mental Health Counselor	What number would you use to rate your main mental health counselor? <i>(0-10)</i>
Unmet Need for Mental Health Services	Did you get all the mental health services you needed? <i>(Yes, No)</i>
Financial Barriers to Mental Health Services	How difficult was it for you to pay for the mental health services you received? <i>(Very difficult, Somewhat difficult, Not very difficult, Not difficult at all)</i>

Provider Tips

- Offer extended hours, telehealth, and various treatment options when possible.
- Let patients know your office hours and how to get after-hour care.
- Partner with the health plan and coordinate care with other specialists and primary care physicians to address whole-person health and access to timely care.
- Assess cultural and linguistic needs, and ask your patients what is important to them.
- Obtain release of information forms and explain the purpose of releasing information to other providers.
- Include family/caregivers/identified support in the treatment plan.
- Invite questions and encourage your patient to take notes.
- Use the “teach-back” method.

Health Outcomes Survey (HOS) ●●

The Medicare Health Outcomes Survey (HOS) measures a health plan’s success in improving and maintaining the functional status of members ages 65 and older. HOS is an annual survey that is conducted from July through November with a random sample of Medicare patients. The same patients are surveyed again two years later to assess changes in health status. HOS measures patients’ perception of their physical & mental health and overall quality of life. **HOS results impact Centers for Medicare & Medicaid Services (CMS) Star Ratings.**

HOS is one of two annual member surveys that monitor patient/member experience that can affect CMS Star Ratings. There are five HOS measures — two functional health measures and three HEDIS® Effectiveness of Care measures in the annual Medicare Part C Star Ratings. For more information, visit the Medicare HOS website at hosonline.org/en/.

The Five HOS Measures

HOS Measure	Survey Question
Improving or Maintaining Physical Health (functional health measure)	“During the past four weeks, have you accomplished less than you would like or been limited in your work or other regular daily activities as a result of your physical health?”
Improving or Maintaining Mental Health (functional health measure)	“During the past four weeks, how much of the time has your physical health or emotional problems interfered with your social activities?”
Monitoring Physical Activity (HEDIS Effectiveness of Care measure)	“In the past 12 months, did you talk with a doctor or other health provider about your level of exercise or physical activity?”
Improving Bladder Control (HEDIS Effectiveness of Care measure)	“Many people experience leakage of urine, also called urinary incontinence. In the past six months have you experienced leaking of urine?”
Reducing the Risk of Falling (HEDIS Effectiveness of Care measure)	“Has your doctor or other health provider done anything to help prevent falls or treat problems with balance or walking?”

Ways Providers Can Impact HOS Outcomes

- Ask questions
- Remember each HOS measure addresses a different aspect of patient care and patient-provider interaction
- Encourage patients to take actions aligning with the HOS measures
- Encourage your patients fill out the HOS (HOS is administered by phone and mail)

HOS Measure 1: Improving or maintaining physical health

This measure assesses the percentage of persons whose physical health was the same or better after two years.

Recommendations	Discussion questions
<ul style="list-style-type: none">• Assess your patients' pain and functional status using standardized tools• Provide interventions to improve physical health, such as disease management, pain management, physical therapy, or care management• Promote self-management support strategies, such as goal-setting, action planning, problem solving, and follow-up to help patients take an active role in improving their health	<ul style="list-style-type: none">• How far can you walk?• Are you able to shop and cook your own food?• Do you have trouble with stairs?• Does pain limit your activities?

HOS Measure 2: Improving or maintaining mental health

This measure assesses the percentage of patients whose behavioral health was the same or better after two years.

Recommendations	Discussion questions
<ul style="list-style-type: none">• Assess your patients' symptoms of depression with the PHQ-2 and, when appropriate, PHQ-9• Refer patients to behavioral health services or manage depression and anxiety treatment as indicated• Promote web-based programs, such as mystrength.com, that provide a range of evidence-based behavioral health self-care resources• Use motivational interviewing to improve treatment engagement and behavioral and physical health outcomes	<ul style="list-style-type: none">• How is your energy throughout the day?• What do you like to do to socialize?• Does alcohol ever get in the way of other important things in life?

HOS Measure 3: Monitoring physical activity

This measure assesses the percentage of patients who discussed exercise with their doctor or other health care provider and were advised to start, increase, or maintain their physical activity within the year.

Recommendations	Discussion questions
<ul style="list-style-type: none"> • Assess your patients' current physical activity level • Discuss health benefits and advise patients to start, maintain, or increase physical activity as appropriate for their individual health status • Develop physical activity plans with patients that match their abilities. • Refer patients with limited mobility to physical therapy to learn safe and effective exercises • Encourage participation in a gym, fitness and exercise programs, and local community resources 	<ul style="list-style-type: none"> • What does your exercise routine look like? • What activities do you enjoy? • Do you feel better when you are more active?

HOS Measure 4: Improving bladder control

This measure assesses the percentage of patients with urinary incontinence (UI) who discussed the problem and treatment options with their health care providers.

Recommendations	Discussion questions
<ul style="list-style-type: none"> • Assess concerns with UI in the last six months and document discussion on the My Wellness and Prevention Checklist • Assess the severity of the condition and the impact of UI on patients' quality of life. Involve patients in decisions about treatment options that work best for them. These options include behavioral (such as bladder training and pelvic muscle rehabilitation), pharmacological, and surgical therapies • Have informative brochures and materials visible and available as discussion starters 	<ul style="list-style-type: none"> • Have you had leakage in the past six months? • How often have you had leakage and when does it occur? • Has leakage affected your daily life (such as social withdrawals, depression, or sleep deprivation)?

HOS Measure 5: Reducing risk of falling

This measure assesses the percentage of patients with falling, walking, or balance problems who discussed these topics with their providers and received treatment within the year.

Recommendations	Discussion questions
<ul style="list-style-type: none"> • Assess fall risk by asking patients about falling, gait, and balance problems • Provide fall prevention interventions, such as promoting regular exercise, strengthening and balance activities (tai chi, yoga), promoting regular eye exams, and providing appropriate educational materials • Promote home safety, such as: <ul style="list-style-type: none"> – Removal of throw rugs and clutter to reduce tripping – Installing handrails on stairs and grab bars in the bathroom • Use of non-slip mats in the tub or shower • Use of night lights to keep halls well lit 	<ul style="list-style-type: none"> • Have you had a fall in the past year? • Can you tell me about the circumstances of the fall? • Do you think the fall could have been prevented? • Have you felt dizzy, or had problems with balance or walking in the past year? • Have you had any vision problems? • Have you had a recent eye exam?

Critical Incidents (CI) ●●●

A critical incident (CI) is any alleged or actual event that poses a risk of serious harm, injury, or death of the member.

Critical incidents include, but are not limited to:

- Abuse
- Fraud
- Neglect
- Exploitation
- Behavioral Health Issues
- Unanticipated Death
- Legal/Criminal Activity
- Medication Management
- Restraint/Seclusion/or Other Restrictive Intervention
- Medical Emergency/Injury/Illness
- Missing Person/Elopement
- Environmental/Unsafe Housing/Displacement

Types of abuse can include physical abuse, verbal abuse, sexual abuse, or harassment, and mental or emotional abuse.

Reporting Critical Incidents

1. Identify the appropriate CI type
2. Complete a Critical Incident Reporting Form if incident occurred within the past year
 - Submit within 24 hours of discovering the incident
3. Email Critical Incident Reporting Form to criticalincidents@mhplan.com

The Critical Incident Reporting Form can be found here:

ILmeridian.com/providers/resources/forms-resources.html.

Cultural Competence ●●●

Cultural Competence is a set of attitudes, behaviors, and policies that enable people to work effectively in cross-cultural situations. We serve a diverse patient population. The ability to understand and relate to different cultures can help you communicate effectively with your patients. All Meridian network providers are contractually required to complete the online cultural competency training annually. In addition, our parent company, Centene, offers a free cultural competency training that provides 1 CEU upon completion.

Access the training material on our website at [ILmeridian.com/providers/resources/provider-training.html](https://www.meridian.com/providers/resources/provider-training.html).

Tips for Providing Culturally Competent Care

Consider population-specific conditions: Low-income/low-literacy, education, disability, race, ethnicity, religion, spirituality, age, gender identity, and urbanicity.

Ask about cultural practices: Spiritual traditions, dietary restrictions, and more may impact a patient's clinical experience.

Practice transcultural techniques: Approach a new patient slowly, be respectful, sit in a quiet setting, and sit a comfortable distance away.

Ensure patient's understanding of care: Lack of accessible medication instructions in a patient's language can impact quality of care. Ensure patient comprehension by providing translated educational materials and utilizing qualified medical interpreters when necessary.

Things to Remember

- 1 in 4 Americans live with a disability and are twice as likely to find his or her provider's skills or facilities inadequate.
- 1 in 5 Americans speak a language other than English at home. Language barriers can prevent patients from effectively conveying their ailments and understanding their care plans.
- 3.6 million Americans miss or delay medical care because they lack reliable transportation.
- Invest in Americans with Disabilities Act (ADA)-approved renovations and train staff on disabilities, challenges, and rights.
- Speak slowly, summarize, demonstrate, and use appropriate terminology when providing instructions. Ensure that patients understand the instructions at the end of the visit.
- Call Meridian's transportation service at **866-796-1165** at least three business days prior to a patient's appointment.

Social Determinants of Health (SDOH) ●●●●●

Social determinants of health are the everyday factors that can impact how healthy a person is regardless of their clinical care. These everyday factors include where a person lives, grows, plays, works, and worships which directly impact financial stability, access to adequate education, access to healthcare, community infrastructure, and social and community context. Addressing SDOH improves medication adherence, supports adherence to treatment plans, and reduces avoidable healthcare utilization.

What can you do?

- Screen for SDOH during all patient visits. Consider using a standard SDOH screener such as PRAPARE (find eligible screening instruments under the **Social Needs Screening and Intervention [SNS-E]** measure)
- Document findings in the patients' medical record using SDOH related Z-Codes 55-65
- Refer patients to community resources and/or care coordination

Reference the **Social Needs Screening and Intervention (SNS-E)** measure to ensure your practice is effectively capturing and sharing this information with the health plan.

If you are interested in learning more about SDOH and what you can do to help improve patient outcomes, please refer to the following additional resources:

Quality Education Webinars (QEW) ●●●●●

To support our providers in their quality improvement efforts, Meridian's Quality Improvement team hosts a series of webinars on topics related to improving patients' quality of care.

We hope these sessions will assist provider teams to improve HEDIS® scores and drive better incentive payments to your practice.

All office staff can attend, including providers, administrative staff, and quality teams. Participants can watch the webinars remotely using the Microsoft Teams meeting invitation link provided. If you are interested in being added to the invite distribution list, please email ILHEDISOps@mhplan.com. [Sign up for health plan news](#) to find out about upcoming webinars and receive HEDIS tips.

Sample webinar topics include:

- Behavioral Healthcare
- HEDIS® Pay for Quality (P4Q) Program
- HEDIS® Measure & Exclusion Criteria
- Best Practices for Closing Care Gaps
- CAHPS® Survey and Patient Satisfaction
- Z-codes and Social Determinants of Health
- Health Outcomes Survey (HOS)
- Start Smart for Your Baby® program
- Overview of Illinois family of plans: Meridian Medicaid Plan, Wellcare, YouthCare, Wellcare Meridian Dual Align (HMO D-SNP), and Ambetter
- Risk Adjustment
- Member Outreach with Care Coordination
- Vendor Updates and Outreach

Access & Availability

To ensure medical services are available to our members on a timely basis, Primary Care Provider (PCP), behavioral health, and specialist appointment availability standards for Meridian and its family of plans are established and noted in the following section. Information is included for all plans, including the Meridian Medicaid Plan, YouthCare, Wellcare By Meridian (D-SNP), Ambetter, and Wellcare.

Each year, our Quality Improvement team conducts a telephone audit using the standards below set forth by NCQA, CMS, and/or state regulations. These audits are conducted to monitor provider compliance with Illinois Medicaid contract requirements. The process of conducting the annual audits is outlined below.

IDENTIFY: Meridian audits a sample of its contracted PCPs, behavioral health practitioners, and specialists.

OUTREACH: Conducted by a third-party vendor via phone, up to three attempts are made to reach a live person.

ANALYZE: Analysis is performed based on all data collected.

REPORT: Letters are mailed to offices indicating the results of the audit. Any offices that did not meet the standards are placed on a corrective action plan and are asked to identify ways to improve their appointment availability.

1. Medicaid Appointment and Timely Access to Care Standards

Primary Care Appointments	
Type of Care/Appointment	Length of Wait Time
Preventative/Routine Care (Child < 6 months)	Within two (2) weeks of request
Preventative/Routine Care (Child ≥ 6 months)	Within five (5) weeks of request
Preventative/Routine Care (Adult)	Within five (5) weeks of request
Urgent/Non-Emergent (Medically Necessary) Care	Within one (1) business day of request
Non-Urgent/Non-Emergent Conditions	Within three (3) weeks of request
Initial Prenatal w/o Problems (First Trimester)	Within two (2) weeks of request
Prenatal (Second Trimester)	Within one (1) week of request
Prenatal (Third Trimester)	Within three (3) calendar days of request
Office Wait Time	Within thirty (30) minutes
Different Hours for Member Plans?	No, hours must be the same for all members and patients

Medicaid Appointment and Timely Access to Care Standards (continued)

Behavioral Health Appointments	
Type of Care/Appointment	Length of Wait Time
Life-Threatening Emergency	Immediate admittance or referred to the Emergency Room
Non-Life-Threatening Emergency	Within six (6) hours of request
Urgent Care Visit	Within forty-eight (48) hours of request
Initial Visit for Routine Care	Within ten (10) business days of request
Follow-Up Visit for Routine Care	Within twenty (20) business days of request
Office Wait Time	Within thirty (30) minutes
Different Hours for Member Plans?	No, hours must be the same for all members and patients

Specialty Care Appointments	
Type of Care/Appointment	Length of Wait Time
Routine Care (Child < 6 months)	Within two (2) weeks of request
Routine Care (Child ≥ 6 months)	Within five (5) weeks of request
Routine Care (Adult)	Within five (5) weeks of request
Urgent/Non-Emergent (Medically Necessary) Care	Within one (1) business day of request
Non-Urgent/Non-Emergent Conditions	Within three (3) weeks of request
Office Wait Time	Within thirty (30) minutes
Different Hours for Member Plans?	No, hours must be the same for all members and patients

Medical coverage 24 hours a day, 7 days a week

Medicaid After-Hours Requirements

All participating provider agreements with PCPs, specialists, and behavioral health providers require physicians to provide members with access to care 24 hours a day, seven days a week.

Acceptable after-hours access mechanisms include:

- Answering service
- On-call pager/cellular connection
- Call forwarding to practitioner's home/other location
- Published after-hours telephone number and recorded voice message directing patients to a practitioner for urgent and non-life-threatening conditions.

Acceptable after-hours answering machine instructions include:

Primary Care (PCP)	Behavioral Health (BH)*
Answering system with option to page physician	Answering system provides a direct transfer or paging option to a BH practitioner or on-call clinician
Provides number to access live physician or answering service	Answering system directs or directly connects callers to 24-hour crisis services
Nurse with access to a physician	Advice nurse with access to physician
Pages provides once message is left	Pages provider once message is left
Please hold or press # for physician exchange	Please hold or press # for an answering service

**New NCQA standard, effective July 2026*

Note that the following options are **NOT** acceptable for after-hours instructions:

- An answering machine that only takes a message
- Message providers a phone number, page, email, text, or voicemail without direct connection
- Recommending that members call during business hours
- Recommending member go to an urgent care center or Emergency Room

There must be a method to talk to a physician 24 hours a day, seven days a week regarding after-hours care for urgent or non-life-threatening conditions, as well as instructions to call 911 or go to the Emergency Department in the event of a life-threatening condition or serious trauma.

Messages **should not** instruct members to obtain treatment at the Emergency Department for non-life-threatening conditions. The member must be able to leave a message for an on-call doctor, speak with an on-call doctor, or be forwarded to an on-call doctor.

After-hours voice messages must contain ONE of the following:

- Message forwarding members to on-call provider
- Message forwarding members to an answering service
- Message providing members with the on-call practitioner’s phone number and/or pager number
- Message referring members to another office, practitioner, or on-call service

2. YouthCare Appointment and Timely Access to Care Standards

Primary Care Appointments	
Type of Care/Appointment	Length of Wait Time
Preventative/Routine Care (Child < 6 months)	Within two (2) weeks of request
Preventative/Routine Care (Child ≥ 6 months)	Within five (5) weeks of request
Preventative/Routine Care (Adult)	Within five (5) weeks of request
Urgent/Non-Emergent (Medically Necessary) Care	Within one (1) business day of request
Non-Urgent/Non-Emergent Conditions	Within three (3) weeks of request
Initial Prenatal w/o Problems (First Trimester)	Within two (2) weeks of request
Prenatal (Second Trimester)	Within one (1) week of request
Prenatal (Third Trimester)	Within three (3) calendar days of request
Office Wait Time	Within thirty (30) minutes
Different Hours for Member Plans?	No, hours must be the same for all members and patients

Behavioral Health Appointments	
Type of Care/Appointment	Length of Wait Time
Life-Threatening Emergency	Immediate admittance or referred to the Emergency Room
Non-Life-Threatening Emergency	Within six (6) hours of request
Urgent Care Visit	Within forty-eight (48) hours of request
Initial Visit for Routine Care	Within ten (10) business days of request
Follow-Up Visit for Routine Care	Within twenty (20) business days of request
Office Wait Time	Within thirty (30) minutes
Different Hours for Member Plans?	No, hours must be the same for all members and patients

Specialty Care Appointments	
Type of Care/Appointment	Length of Wait Time
Preventative/Routine Care (Child < 6 months)	Within two (2) weeks of request
Preventative/Routine Care (Child ≥ 6 months)	Within five (5) weeks of request

YouthCare Appointment and Timely Access to Care Standards (continued)

Specialty Care Appointments	
Urgent/Non-Emergent (Medically Necessary) Care	Within one (1) business day of request
Non-Urgent/Non-Emergent Conditions	Within three (3) weeks of request
Office Wait Time	Within thirty (30) minutes
Different Hours for Member Plans?	No, hours must be the same for all members and patients

Medical coverage 24 hours a day, 7 days a week

YouthCare After-Hours Requirements

All participating provider agreements with PCPs, specialists, and behavioral health providers require physicians to provide members with access to care 24 hours a day, seven days a week.

Acceptable after-hours access mechanisms include:

- Answering service
- On-call pager/cellular connection
- Call forwarding to practitioner's home/other location
- Published after-hours telephone number and recorded voice message directing patients to a practitioner for urgent and non-life-threatening conditions.

Acceptable after-hours answering machine instructions include:

Primary Care (PCP)	Behavioral Health (BH)*
Answering system with option to page physician	Answering system provides a direct transfer or paging option to a BH practitioner or on-call clinician
Provides number to access live physician or answering service	Answering system directs or directly connects callers to 24-hour crisis services
Nurse with access to a physician	Advice nurse with access to physician
Pages provides once message is left	Pages provider once message is left
Please hold or press # for physician exchange	Please hold or press # for an answering service

**New NCQA standard, effective July 2026*

Note that the following options are **NOT** acceptable for after-hours instructions:

- An answering machine that only takes a message
- Message providers a phone number, page, email, text, or voicemail without direct connection
- Recommending that members call during business hours
- Recommending member go to an urgent care center or Emergency Room

There must be a method to talk to a physician 24 hours a day, seven days a week regarding after-hours care for urgent or non-life-threatening conditions, as well as instructions to call 911 or go to the Emergency Department in the event of a life-threatening condition or serious trauma.

Messages **should not** instruct members to obtain treatment at the Emergency Department for non-life-threatening conditions. The member must be able to leave a message for an on-call doctor, speak with an on-call doctor, or be forwarded to an on-call doctor.

After-hours voice messages must contain ONE of the following:

- Message forwarding members to on-call provider
- Message forwarding members to an answering service
- Message providing members with the on-call practitioner’s phone number and/or pager number
- Message referring members to another office, practitioner, or on-call service

3. Wellcare By Meridian D-SNP Appointment and Timely Access to Care Standards

Primary Care Appointments	
Type of Care/Appointment	Length of Wait Time
Preventative/Routine Care	Within twenty-five (25) business days of request
Urgent/Non-Emergent (Medically Necessary) Care	Within one (1) business days of request
Non-Urgent/Non-Emergent Conditions (Medically Necessary)	Within seven (7) business days of request
Non-Urgent/Non-Emergent Conditions	Within three (3) weeks of request
Initial Prenatal w/o Problems (First Trimester)	Within two (2) weeks of request
Prenatal (Second Trimester)	Within one (1) week of request
Prenatal (Third Trimester)	Within three (3) days of request
Office Wait Time	Within thirty (30) minutes
Different Hours for Member Plans?	No, hours must be the same for all members and patients
Behavioral Health Appointments	
Type of Care/Appointment	Length of Wait Time
Life-Threatening Emergency	Immediate admittance or referred to the Emergency Room
Non-Life-Threatening Emergency	Within six (6) hours of request
Urgent Care Visit	Within forty-eight (48) hours of request

Wellcare By Meridian D-SNP Appointment and Timely Access to Care Standards (continued)

Behavioral Health Appointments	
Initial Visit for Routine Care	Within ten (10) business days of request
Follow-Up Visit for Routine Care	Within twenty (20) business days of request
Office Wait Time	Within thirty (30) minutes
Different Hours for Member Plans?	No, hours must be the same for all members and patients

Specialty Care Appointments	
Type of Care/Appointment	Length of Wait Time
Routine Care (Adult)	Within twenty-five (25) business days of request
Urgent/Non-Emergent (Medically Necessary) Care	Within one (1) business days of request
Non-Urgent/Non-Emergent Conditions (Medically Necessary)	Within seven (7) business days of request
Non-Urgent/Non-Emergent Conditions	Within three (3) weeks of request
Office Wait Time	Within thirty (30) minutes
Different Hours for Member Plans?	No, hours must be the same for all members and patients

Wellcare By Meridian D-SNP After-Hours Requirements

All participating provider agreements with PCPs, specialists, and behavioral health providers require physicians to provide members with access to care 24 hours a day, seven days a week.

Acceptable after-hours access mechanisms include:

- Answering service
- On-call pager/cellular connection
- Call forwarding to practitioner’s home/other location
- Published after-hours telephone number and recorded voice message directing patients to a practitioner for urgent and non-life-threatening conditions.

Acceptable after-hours answering machine instructions include:

Primary Care (PCP)	Behavioral Health (BH)*
Answering system with option to page physician	Answering system provides a direct transfer or paging option to a BH practitioner or on-call clinician

Wellcare By Meridian D-SNP Appointment and Timely Access to Care Standards (continued)

Primary Care (PCP)	Behavioral Health (BH)*
Provides number to access live physician or answering service	Answering system directs or directly connects callers to 24-hour crisis services
Nurse with access to a physician	Advice nurse with access to physician
Pages provides once message is left	Pages provider once message is left
Please hold or press # for physician exchange	Please hold or press # for an answering service

*New NCQA standard, effective July 2026

Note that the following options are **NOT** acceptable for after-hours instructions:

- An answering machine that only takes a message
- Message providers a phone number, page, email, text, or voicemail without direct connection
- Recommending that members call during business hours
- Recommending member go to an urgent care center or Emergency Room

There must be a method to talk to a physician 24 hours a day, seven days a week regarding after-hours care for urgent or non-life-threatening conditions, as well as instructions to call 911 or go to the Emergency Department in the event of a life-threatening condition or serious trauma.

Messages **should not** instruct members to obtain treatment at the Emergency Department for non-life-threatening conditions. The member must be able to leave a message for an on-call doctor, speak with an on-call doctor, or be forwarded to an on-call doctor.

After-hours voice messages must contain **ONE** of the following:

- Message forwarding members to on-call provider
- Message forwarding members to an answering service
- Message providing members with the on-call practitioner’s phone number and/or pager number
- Message referring members to another office, practitioner, or on-call service

4. Marketplace (Ambetter) Appointment and Timely Access to Care Standards

Primary Care Appointments	
Type of Care/Appointment	Length of Wait Time
Preventative/Routine Care	Within fifteen (15) calendar days of request
Urgent/Non-Emergent (Medically Necessary) Care	Within twenty-four (24) hours of request

Marketplace (Ambetter) Appointment and Timely Access to Care Standards (continued)

Primary Care Appointments	
Type of Care/Appointment	Length of Wait Time
Sick Care	Within twenty-four (24) hours of request
Office Wait Time	Within thirty (30) minutes
Different Hours for Member Plans?	No, hours must be the same for all members and patients

Behavioral Health Appointments	
Type of Care/Appointment	Length of Wait Time
Life-Threatening Emergency	Immediate admittance or referred to the Emergency Room
Non-Life-Threatening Emergency	Within six (6) hours of request
Urgent Care Visit	Within forty-eight (48) hours of request
Initial Visit for Routine Care	Within ten (10) business days of request
Follow-Up Visit for Routine Care	Within ten (10) business days of request
Office Wait Time	Within thirty (30) minutes
Different Hours for Member Plans?	No, hours must be the same for all members and patients

Specialty Care Appointments	
Type of Care/Appointment	Length of Wait Time
Routine Care	Within thirty (30) calendar days of request
Urgent Care Visit	Within forty-eight (48) hours of request
Office Wait Time	Within thirty (30) minutes
Different Hours for Member Plans?	No, hours must be the same for all members and patients

Medical coverage 24 hours a day, 7 days a week

Marketplace (Ambetter) After-Hours Requirements

All participating provider agreements with PCPs, specialists, and behavioral health providers require physicians to provide members with access to care 24 hours a day, seven days a week.

Acceptable After-Hours access mechanisms include:

- Answering service
- On-call pager/cellular connection

- Call forwarding to practitioner’s home/other location
- Published after-hours telephone number and recorded voice message directing patients to a practitioner for urgent and non-life-threatening conditions.

Acceptable after-hours answering machine instructions include:

Primary Care (PCP)	Behavioral Health (BH)*
Answering system with option to page physician	Answering system provides a direct transfer or paging option to a BH practitioner or on-call clinician
Provides number to access live physician or answering service	Answering system directs or directly connects callers to 24-hour crisis services
Nurse with access to a physician	Advice nurse with access to physician
Pages provides once message is left	Pages provider once message is left
Please hold or press # for physician exchange	Please hold or press # for an answering service

**New NCQA standard, effective July 2026*

Note that the following options are **NOT** acceptable for after-hours instructions:

- An answering machine that only takes a message
- Message providers a phone number, page, email, text, or voicemail without direct connection
- Recommending that members call during business hours
- Recommending member go to an urgent care center or Emergency Room

There must be a method to talk to a physician 24 hours a day, seven days a week regarding after-hours care for urgent or non-life-threatening conditions, as well as instructions to call 911 or go to the Emergency Department in the event of a life-threatening condition or serious trauma.

Messages **should not** instruct members to obtain treatment at the Emergency Department for non-life-threatening conditions. The member must be able to leave a message for an on-call doctor, speak with an on-call doctor, or be forwarded to an on-call doctor.

After-hours voice messages must contain ONE of the following:

- Message forwarding members to on-call provider
- Message forwarding members to an answering service
- Message providing members with the on-call practitioner’s phone number and/or pager number
- Message referring members to another office, practitioner, or on-call service

5. Wellcare (Medicare) Appointment and Timely Access to Care Standards

Primary Care Appointments	
Type of Care/Appointment	Length of Wait Time
Preventative/Routine Care	Within thirty (30) business days of request
Urgent/Non-Emergent (Medically Necessary) Care	Within twenty-four (24) hours of request
Sick/Non-Urgent Care	Within seven (7) business days of request
Office Wait Time	Within thirty (30) minutes
Different Hours for Member Plans?	No, hours must be the same for all members and patients

Behavioral Health Appointments	
Type of Care/Appointment	Length of Wait Time
Life-Threatening Emergency	Immediate admittance or referred to the Emergency Room
Non-Life-Threatening Emergency	Within six (6) hours of request
Urgent Care Visit	Within forty-eight (48) hours of request
Initial Visit for Routine Care	Within ten (10) business days of request
Follow-Up Visit for Routine Care	Within thirty (30) business days of request
Office Wait Time	Within thirty (30) minutes
Different Hours for Member Plans?	No, hours must be the same for all members and patients

Specialty Care Appointments	
Type of Care/Appointment	Length of Wait Time
Routine Care	Within thirty (30) business days of request
Urgent Care Visit	Within twenty-four (24) hours of request
Office Wait Time	Within thirty (30) minutes
Different Hours for Member Plans?	No, hours must be the same for all members and patients

Medical coverage 24 hours a day, 7 days a week

Wellcare (Medicare) After-Hours Requirements

All participating provider agreements with PCPs, specialists, and behavioral health providers require physicians to provide members with access to care 24 hours a day, seven days a week.

Acceptable After-Hours access mechanisms include:

- Answering service
- On-call pager/cellular connection
- Call forwarding to practitioner’s home/other location
- Published after-hours telephone number and recorded voice message directing patients to a practitioner for urgent and non-life-threatening conditions.

Acceptable after-hours answering machine instructions include:

Primary Care (PCP)	Behavioral Health (BH)*
Answering system with option to page physician	Answering system provides a direct transfer or paging option to a BH practitioner or on-call clinician
Provides number to access live physician or answering service	Answering system directs or directly connects callers to 24-hour crisis services
Nurse with access to a physician	Advice nurse with access to physician

- Message forwarding members to on-call provider
- Message forwarding members to an answering service
- Message providing members with the on-call practitioner’s phone number and/or pager number
- Message referring members to another office, practitioner, or on-call service

Caring for and Communicating with Individuals with Intellectual and Developmental Disabilities (IDD) ●●●●●

As a provider, it is important to be aware of the following health disparities individuals with intellectual and developmental disabilities may experience:

- Fewer preventive screenings than the general population
- Financial and transportation limitations
- Lack of access to providers with specialized training or experience caring for individuals in these populations

Complete an Annual Functional Status Assessment

This assessment measures the patient's ability to perform daily tasks and helps to identify any functional decline. For Meridian patients, please indicate one of the following in the medical record:

- Notation and date that Activities of Daily Living (ADL) were assessed: Bathing, dressing, eating, transferring, using toilet, walking
- Notation and date that Instrumental Activities of Daily Living (IADL) were assessed: Shopping, driving or using public transportation, meal preparation, housework, taking medications, using the telephone
- Result of a standardized functional status assessment and the date it was performed: Assessment of Living Skills and Resources (ALSAR), Barthel ADL Index Physical Self-Maintenance (ADLS) Scale, Bayer Activities of Daily Living (B-ADL) Scale, Extended Activities of Daily Living (EADL) Scale
- Chronic conditions at a younger age
- A higher risk of obesity
- A greater incidence of mental illness
- An accelerated aging process

It is important that providers and health plans adapt and coordinate care for this population by communicating appropriately and respectfully about individuals with disabilities.

Individuals with intellectual and developmental disabilities may go through cognitive and behavioral changes. These include anxiety, depression, dementia, self-injurious behavior, and other factors. These changes may result from pain and discomfort related to other medical issues.

As a provider, it is important to be aware of the following ways to communicate and to emphasize the person first, not the disability:

- Emphasize abilities, not limitations
- Do not use language that suggests the lack of something
- Emphasize the need for accessibility, not the disability
- Do not use offensive language
- Avoid language that implies negative stereotypes
- Do not portray people with disabilities as inspirational only because of their disability

Tips on Using People-First Language

This chart provides tips on what language to use when communicating with an individual with a disability.

Tips	Use	Do Not Use
Emphasize abilities, not limitations	Person who uses a wheelchair	Confined or restricted to a wheelchair, wheelchair bound
	Person who uses a device to speak	Can't talk, mute
Do not use language that suggests the lack of something	Person with a disability	Disabled, handicapped
	Person of short stature	Midget
	Person with cerebral palsy	Cerebral palsy victim
	Person with epilepsy or seizure disorder	Epileptic
	Person with multiple sclerosis	Afflicted by multiple sclerosis
Emphasize the need for accessibility, not the disability	Accessible parking or bathroom	Handicapped parking or bathroom
Do not use offensive language	Person with a physical disability	Crippled, lame, deformed, invalid, spastic
	Person with an intellectual, cognitive, developmental disability	Slow, simple, moronic, defective, afflicted, special person
	Person with an emotional or behavioral disability, mental health impairment, or a psychiatric disability	Insane, crazy, psycho, maniac, nuts
Avoid language that implies negative stereotypes	Person without a disability	Normal person, healthy person
Do not portray people with disabilities as inspirational only because of their disability	Person who is successful, productive	Has overcome his/her disability, is courageous

Early Periodic Screening, Diagnosis, and Treatment (EPSDT) ●●

The Early Periodic Screening, Diagnosis, and Treatment (EPSDT) program promotes the physical, mental, social, emotional, and behavioral health of children under the age of 21 through recommended well-child screenings.

These services give children early access to preventative and comprehensive healthcare to help prevent disease and identify medical, developmental, and social-emotional concerns in their early stages — when they are more effectively treated.

Mandatory Screening Components

An EPSDT screening for Medicaid members must include:

- **Initial and interval history**, including a comprehensive health and developmental history of physical and mental development
- **An unclothed physical exam**, documented in the member's medical chart
- **Measurements**: Weight, length, head circumference, body mass index (BMI) percentile*, and blood pressure
- **Nutrition/obesity prevention**: Assess and educate, with specific documentation on nutrition and physical activity*
- **Oral health assessment*** and age-appropriate fluoride varnish application

Specific Screenings

- Caregiver and/or adolescent depression screening
- Developmental surveillance/screening
- Autism screening
- Psychosocial/behavioral assessment
- Alcohol and drug use assessment
- Sensory screenings for vision and hearing*

Immunizations and Age-Appropriate Screenings

- Review immunization history and administer immunizations at recommended ages or as needed
- Offer anticipatory guidance and health education at every visit
- Conduct age-appropriate laboratory tests, including:
 - Lipid screening
 - Hemoglobin/hematocrit
 - Lead blood testing (2)/risk screening
 - Newborn screening: blood, hearing, critical congenital heart disease
 - Sexually transmitted infections and HIV screening
 - Cervical dysplasia screening
 - TB testing
- Provide other medically necessary health care, diagnostic services, and treatment measures

* These areas are frequently non-compliant or not properly documented to show compliance during medical record reviews.

*Codes listed are subject to change. Meridian recognizes that the circumstances around the services provided may not always directly support/match the codes. It is crucial that the medical record documentation describes the services rendered in order to support the medical necessity and use of these codes.

Point of Service Code Definitions

Code	Description
02	Telehealth Provided Other than in Patient's Home
03	School
05	Indian Health Service Free-standing Facility
07	Tribal 638 Free-standing Facility
09	Prison/Correctional Facility
10	Telehealth Provided in Patient's Home
11	Office
12	Home
13	Assisted Living Facility
14	Group Home
15	Mobile Unit
16	Temporary Lodging
17	Walk-in Retail Health Clinic
18	Place of Employment-Worksite
19	Off Campus-Outpatient Hospital
20	Urgent Care Facility
21	Inpatient Hospital
22	On Campus-Outpatient Hospital
31	Skilled Nursing Facility
32	Nursing Facility
33	Custodial Care Facility
49	Independent Clinic
50	Federally Qualified Health Center
51	Inpatient Psychiatric Facility
56	Psychiatric Residential Treatment Center
57	Non-residential Substance Abuse Treatment Facility
58	Non-residential Opioid Treatment Facility
71	Public Health Clinic
72	Rural Health Clinic
